Report Timeframe: June 18 to June 24, 2023

Statewide hospitalization levels: Low. New COVID-19 admissions are below 10 per 100,000 Vermonters per day.
- New hospital admissions of patients with COVID-19, last 7 days: 2.88 per 100K
    - 18 total new admissions with COVID-19 (increase from previous week)

The number of reportable COVID-19 cases is still available in this report, below. Laboratory-confirmed and diagnosed COVID-19 cases and COVID-19 outbreaks must still be reported to the Vermont Department of Health

Vermont Department of Health recommendations: Preventing COVID-19 (healthvermont.gov)

Hospitalizations Over Time

Daily Hospitalizations With COVID-19 Diagnosis
**Seven-Day Rolling Average**

Source: U.S. Department of Health and Human Services HHS Protect

The seven-day rolling average of hospital patients admitted with a laboratory-confirmed COVID-19 was between one and about two and one-half. The number is the daily average of the previous seven days; for example, the value for May 28 is the daily average for the days of May 21 through May 27.
Syndromic Surveillance

The Electronic Surveillance System for the Early Notification of Community-based Epidemics (ESSENCE) reflects all individual visits from participating emergency departments[1], to identify visits for COVID-Like Illness (CLI). During this reporting period the proportion of emergency visits in participating departments that included CLI was about 1%, less than the same time in 2022.

Percent of Emergency Visits with COVID-Like Illness
Seven-Day Rolling Average, over Calendar Year

Source: Electronic Surveillance System for the Early Notification of Community-based Epidemics (ESSENCE)

Proportion of sequenced variants

No new sequences were available during the most recent week. (Sources: Broad; Aegis; Helix; LabCorp; Quest; Health Department Whole Genome Sequencing program)

---

[1] All Vermont hospitals and two urgent care clinics are included in ESSENCE.
Wastewater Monitoring

Vermont wastewater districts participating with the National Wastewater Surveillance System (NWSS).

There are more increases than decreases this week.

NWSS Site	15-day % change
Bennington	Decrease between 10%-99%
Brighton	Increase of 1000% or more
Burlington (Main plant)	Increase between 100%-999%
Burlington (North plant)	Decrease between 10%-99%
Essex Junction	Decrease between 10%-99%
Ludlow	Increase between 100%-999%
South Burlington	Decrease between 10%-99%
St. Albans City	Increase between 10%-99%
St. Johnsbury	Increase of 1000% or more
Troy / Jay WWTP	*
Winooski	Increase between 100%-999%

Identified Cases

Vermont Weekly Case Counts/Rates

Note: Case counts and rates are calculated by *confirmed* and *probable* cases reported to the Health Department.

To calculate rates, counts are divided by 2019 Vermont population estimates for respective category and expressed per 100,000 in each category.

Due to a high number of cases missing race/ethnicity data, rates are not provided for race/ethnicity categories.

COVID-19 Outbreaks Reported June 20 to June 26

For purposes of this report, an outbreak is defined as three or more epidemiologically linked cases of COVID-19, where at least one such case has been laboratory or otherwise clinically confirmed as COVID-19.
Facility type	New Outbreaks Reported 6/20– 6/26
Long-term Care (LTC)	-
Non-LTC Healthcare	1
Correctional Facility	-
School/childcare	-
Other	-

County	New Outbreaks Reported 6/20 – 6/26
