

Radon in Private Water by Town: Percent of Tests Above the VHA (Vermont Health Advisory = 4000 pCi/L)

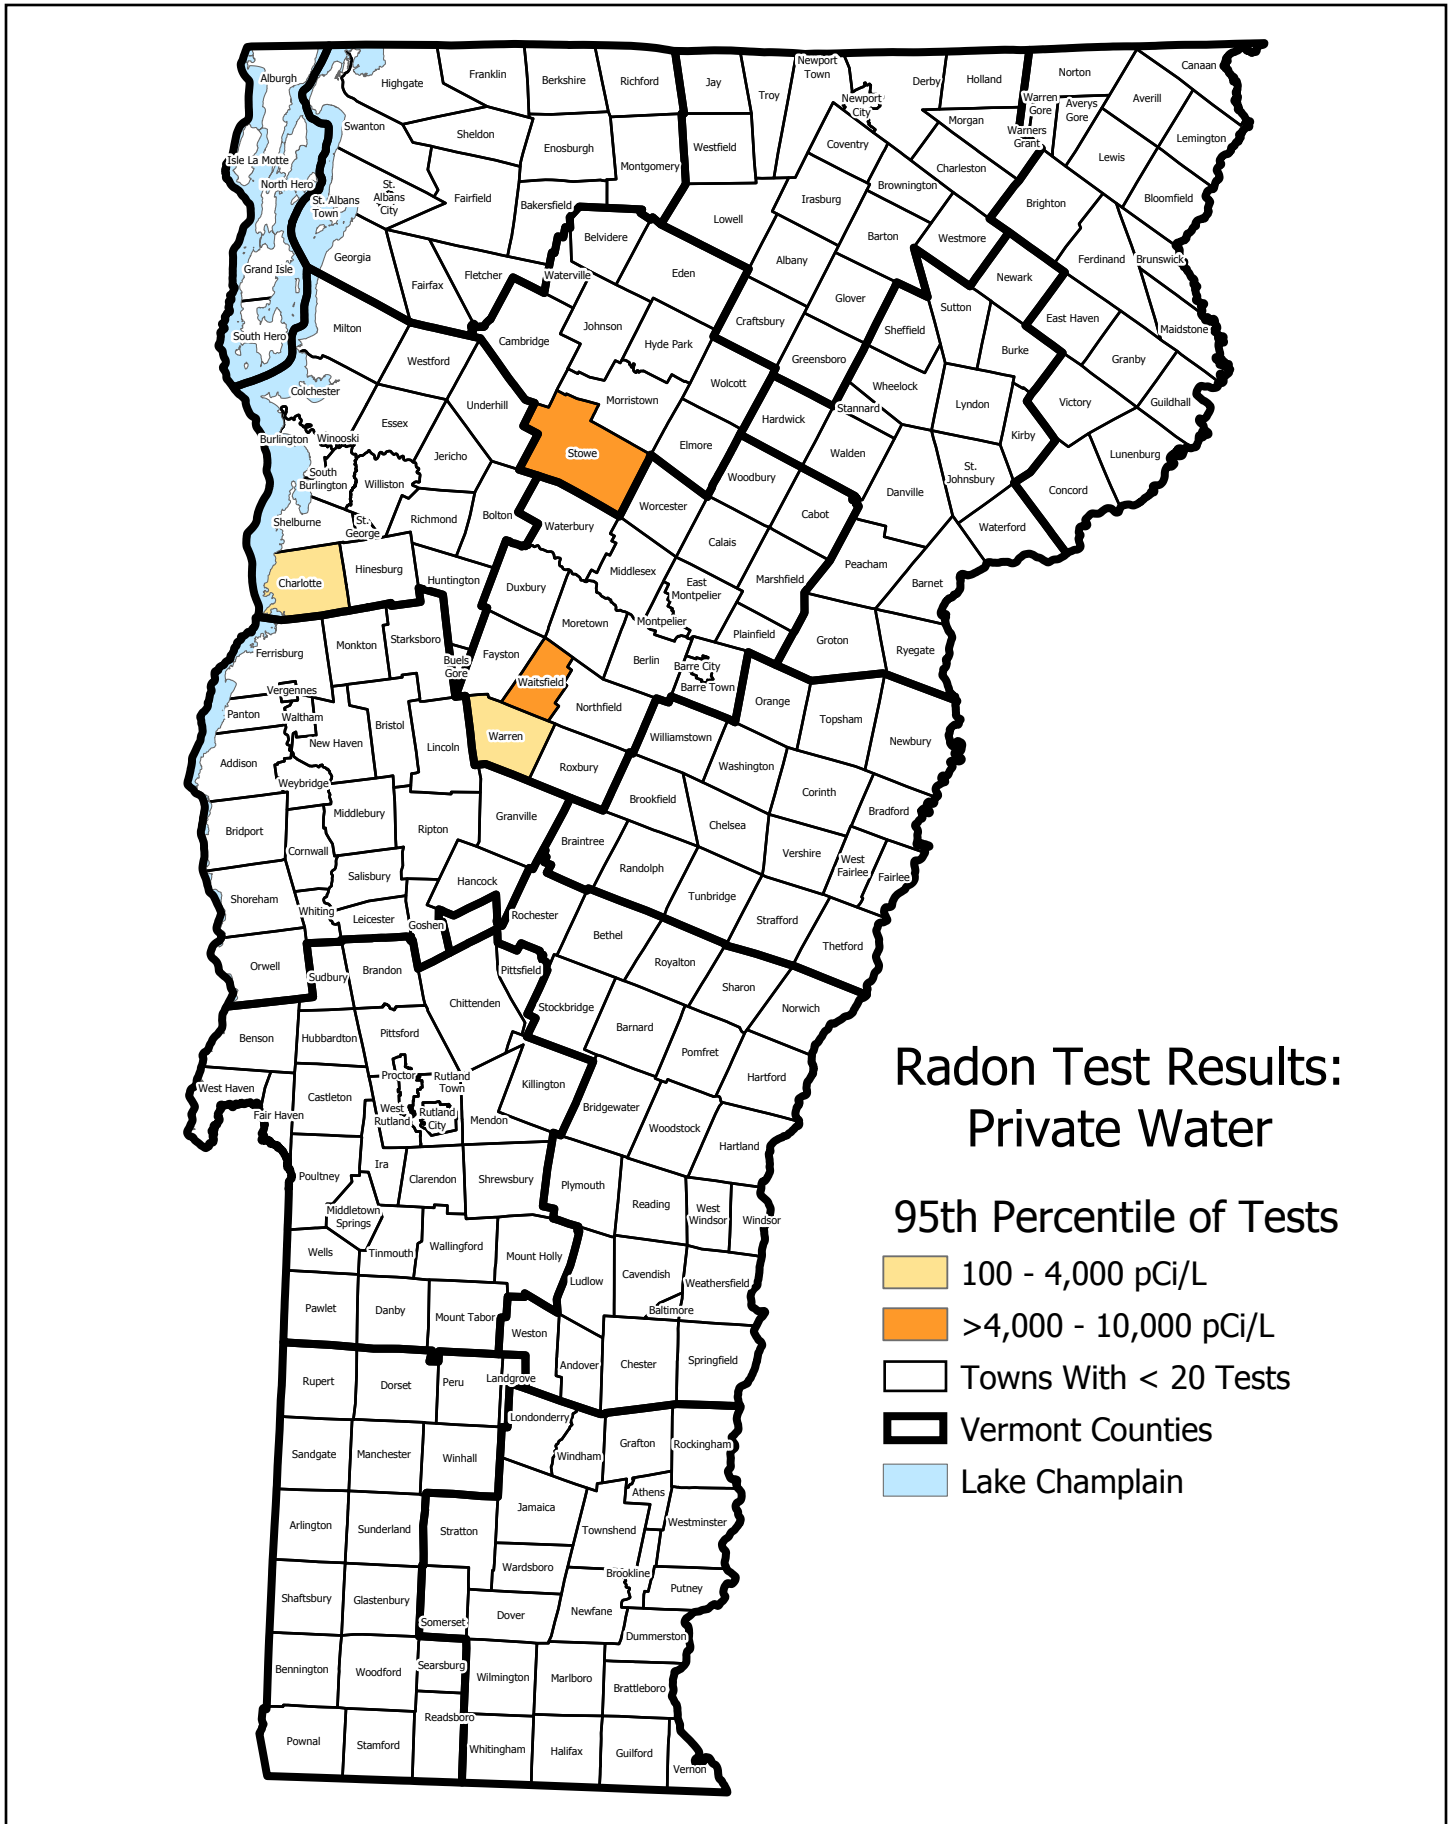

Radon Test Results: Private Water

% Tests Above VHA (4,000 pCi/L)

- >0% - 10%
- >10% - 25%
- Towns With < 20 Tests
- Vermont Counties
- Lake Champlain

Radon in Private Water by Town: 95th Percentile of Tests (Vermont Health Advisory = 4000 pCi/L)

Radon Water Test Result Summary (No Suppression)
Vermont Health Advisory (VHA) = 4000 pCi/L
Data Sources: Vermont Department of Health Laboratory 2011-2018

| Vermont Towns | Number of Tests | % Tests Above VHA | Concentration of Radon in picoCuries per liter (pCi/L) | | | | | | |

* Indicates less than the minimum detection limit (MDL) of the laboratory test, typically less than 100 pCi/L.

Notes:

- In order to calculate statistics, a value of 50 pCi/L (½ the MDL) was substituted as the sample result for each "not detected" value.
- Towns NOT included in the table, have "Number of Tests" = 0
- Some towns in Vermont have a small number of private well test results. Statistical tests based on a smaller number of test results are less reliable than statistical tests based on a larger number of sample results. Data in this table, especially when based on less than 20 test results, should be interpreted with caution. Any conclusions should be drawn with the number of test results for a given town in mind.
