

The **Patients Immunized by Series** report in the Vermont Immunization Registry can be a helpful tool to identify patients in your practice who have received COVID-19 doses at hospitals, pharmacies, mass clinics or medical practices. Run the **Patient List by Date of Birth** for a comprehensive list of your patients in specific age groups.

To find the Registry: Enter “Vermont Immunization Registry” in any search engine. You will need a username and password. If you have forgotten yours, or do not have one, call us at (888) 688-4667.

To find the report in the registry: Log in with your password and search for and select any patient record. Now select Immunization Registry in the blue navigation bar at the left-hand side of the screen. The screenshot below shows the immunization screen, and the red arrow points to the **Patients Immunized by Series** report.

	Influenza, live, intranasal, quadrivalent					
	Influenza-IIV4, IM (>3yrs)					

Creating the report: When this screen comes up, be sure the correct practice is selected. The vaccine Group will default to COVID-19. Enter the start date of 12/15/2020*, and end date of the current date. We recommend sorting by DOB so you can evaluate patients in specific age groups. Click Create Report.

NOTE: Choose a date range of ten years or less for best results. If there are too many patients in a selected age range, this report may time out.
