CAPABILITY OF UNIT - CLARIFICATION!

I have changed the wording of the **"Primary Role of Unit"** question on the <u>Response tab</u> to **"Capability of Unit"** to be more clear about what this question is asking. You will also see that the options have changed to:

Ambulance (ALS)

Ambulance (BLS)

First Response

Critical Care Ambulance

Medic Intercept

Call Turn Over – Administrative.

If you are an **ambulance** agency, you will ALWAYS choose either "Ambulance (ALS)" or "Ambulance (BLS)" as the "Capability of Unit."

If you are a **first response** agency, you will ALWAYS choose "First Response."

The only exception is for mutual aid calls or calls that your agency is toned out to, but that no one is able to respond to. If you record these calls that your agency was toned to but could not respond to, select **Call Turn Over – Administrative.**

***CLARIFICATION 3/13/17

*If you are an **ambulance agency** and you are dispatched to a scene, but you are unable to send an ambulance (because it is out on another call, you don't have a crew, etc.) you will choose **"Call Turn Over"** as your selection. However, you can still document any first responder who responds from your agency to the scene and any care they provide in this same form.*
