Table 1B - Count of Top 2016 Inpatient Diagnoses

The counts displayed include each community hospital's top inpatient diagnoses by volume. These pages provide the number of cases for these diagnoses for the period of 10/1/2015 to 9/30/2016. Hospital System Number of Cases and Average Gross Charges include all hospitals. For individual hospitals, diagnoses having fewer than 15 cases are excluded. Blanks in the table indicate that the hospital has fewer than 15 cases for that diagnosis or the hospital does not admit patients with that particular diagnosis. The hospital, however, may admit patients with similar diagnoses under a different code which may not be shown. Treating a given diagnosis may entail more than one procedure. Please call the hospital for more information.
