

Care Alliance

for Opioid Addiction

The Care Alliance for Opioid Addiction is a statewide partnership of clinicians and treatment centers to provide Medication Assisted Therapy (MAT) to Vermonters who are addicted to opioids.

Summary

The Care Alliance uses a Hub & Spoke model to ensure that each person's care is effective, coordinated and supported.

Entry to Care: A person may enter care by requesting services at a regional opioid treatment center (Hub), or their primary care provider (Spoke), or by dialing 2-1-1.

Regional Opioid Treatment Centers (Hub) located around the state treat those patients who have especially complex needs with medication assisted therapy, using methadone or buprenorphine.

Physicians lead a team of nurses and clinicians (Spoke) to treat patients with medication assisted therapy, using buprenorphine.

Care Coordination and Support: Each patient's care is supervised by a physician and supported by nurses and counselors who work to connect the patient with community-based support services. Depending on need, these services may include mental health and substance abuse treatment, pain management, life skills and family supports, job development and recovery supports.

Goals

- ✓ Access to treatment
- ✓ Effective treatment
- ✓ Whole person approach
- ✓ Seamless care
- ✓ Prevent drug diversion
- ✓ Recovery
