Key Information

The data years for the measures are: adverse childhood experiences (2011), community resources for physical activity (2011-2012), oral health & cancer (breast & colorectal) screening (2014 & 2016), cervical cancer screening (2012 & 2014), physical activity & strength building, cholesterol, hypertension, fruit & vegetable consumption, prescription drug misuse (2013 & 2015), disability (2014-2015), & all others (2015-2016). VT data listed is the most recent single year; statistical comparisons were made using the two-year combinations noted above.

*Percent is age adjusted to U.S. 2000 population.

**Estimated counts are rounded to the nearest thousand Vermonters and not age-adjusted. For measures where the percent is calculated using two years of data, the estimated count is divided by two to provide an average number of individuals with the behavior or condition.

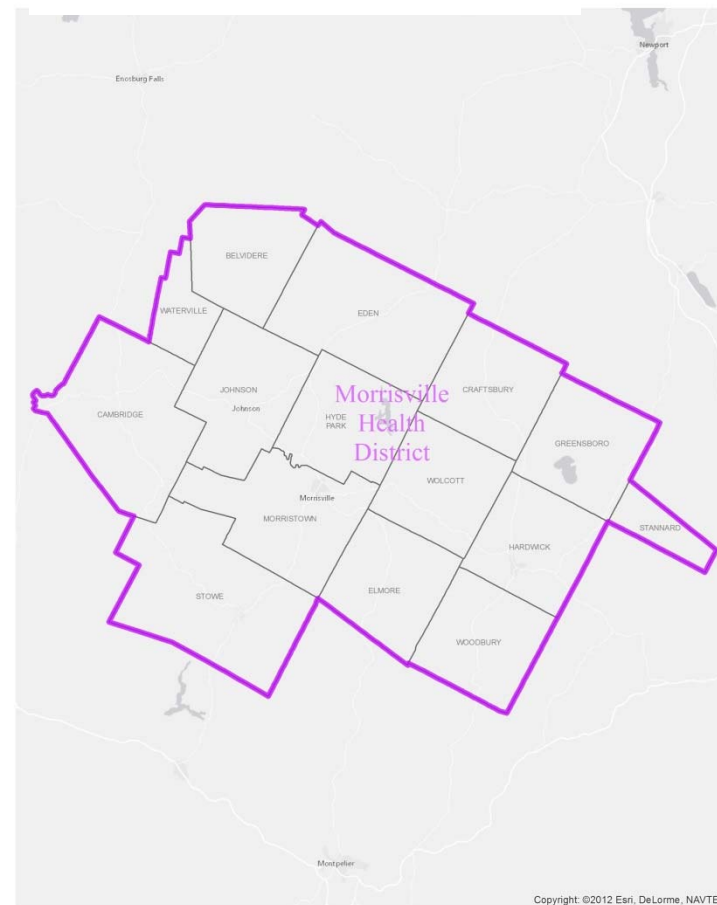

☐ Indicates statistically different from Vermont.

Definitions:

- Poor physical health: 14 or more poor physical health days in last month.
- Poor mental health: 14 or more poor mental health days in last month.
