**Do Not Resuscitate (DNR)/ Clinician Orders For Life Sustaining Treatment (COLST)**

**PLEASE NOTE THE MANDATED USE OF THE VERMONT DEPARTMENT OF HEALTH’S DNR/COLST FORM IN THE FOLLOWING CIRCUMSTANCES:**

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>DNR orders</td>
<td>Signed by the patient’s clinician. A verbal order documented with the clinician’s name, and signed and dated by the patient’s nurse or social worker is acceptable.</td>
</tr>
<tr>
<td>COLST orders</td>
<td>Signed by the patient’s clinician. A verbal order documented with the clinician’s name, and signed and dated by the patient’s nurse or social worker is acceptable.</td>
</tr>
</tbody>
</table>

**TO BE VALID DNR/COLST ORDERS MUST MEET THE FOLLOWING CRITERIA:**

- **DNR Orders must:**
  - Be signed by the patient’s clinician. A verbal order documented with the clinician’s name, and signed and dated by the patient’s nurse or social worker is acceptable.
  - Certify that the clinician has consulted, or made an effort to consult, with the patient, and the patient’s agent or guardian, if there is an appointed agent or guardian.
  - Must include: the name of the patient, agent or guardian giving informed consent OR meet the futility standard (section A-3).

- **COLST Orders must:**
  - Be signed by the patient’s clinician. A verbal order documented with the clinician’s name, and signed and dated by the patient’s nurse or social worker is acceptable.
  - Include the name of the patient, agent or guardian giving informed consent.

**PEARLS**

- One essential element of providing quality end-of-life care involves honoring patient preferences.
- In the past a Do-Not-Resuscitate Order (DNR) has been used when a patient does not wish to have Cardiopulmonary Resuscitation (CPR). In recent years the old “DNR” order has been incorporated into a new form known as the DNR/COLST order by the Vermont Department of Health. The old “DNR” order only dealt with CPR. The DNR/COLST order deals with CPR as well as intubation, transfer to hospital, antibiotics, hydration and overall goals of care and is the only legal out-of-hospital DNR order in Vermont as of July 1, 2011 (old orders will be honored as long as they complied with the statute at the time they were executed). Healthcare and residential care facilities can document these orders in a facility specific manner for inpatients.
- DNR/COLST is a more complete document that stands for: **Do Not Resuscitate Order/Clinician Orders for Life Sustaining Treatment.**
- These are clinician orders that convey patient’s wishes for CPR, intubation, transfer to the hospital, antibiotics, artificial nutrition and hydration, as well as overall treatment goals.
- EMS personnel are required to perform CPR if indicated for a victim of cardiac arrest unless there is a signed DNR/COLST order in the out-of-hospital setting or termination of resuscitation criteria are met. See **Resuscitation Initiation and Termination Policy 8.17.**
- All forms of DNR/COLST remain valid during a transfer from one healthcare facility to another.
8.8 Do Not Resuscitate (DNR)/Clinician Orders For Life Sustaining Treatment (COLST)

PROCEDURE

- Patients should be assessed per routine procedures and if resuscitation is or may be needed, EMS personnel should make reasonable efforts to check the patient for a DNR identification (bracelet, necklace, anklet) or inquire if there is a written DNR/COLST order available. Attempt to determine the identity of the patient (specifically, name and date of birth).

- **If The Patient/Resident Has No Pulse And/Or No Respirations:**
  - Go to Section A of the DNR/COLST form. If the DNR order is checked and there is a clinician signature, a verbal order documented, and signed and dated by the patient’s nurse or social worker, or the patient has a DNR identification - Do Not initiate CPR or other resuscitation measures.
  - Do not perform chest compressions or actively assist ventilations via BVM.
  - Do not intubate or place advanced airway devices.
  - Do not defibrillate.
  - Do not administer resuscitation drugs to treat cardiac arrest or dysrhythmias (ventricular fibrillation, pulseless ventricular tachycardia, pulseless electrical activity, or asystole).

- **When Confronted With A Seriously Ill Patient Who Is Not In Cardiac Arrest But Is Breathing And/Or Has A Pulse:**
  - Go to Sections B – G of the DNR/COLST form to review Orders for Other Life-Sustaining Treatment. Check for do not intubate orders (DNI), transfer to hospital orders, orders for medical interventions and other instructions. In Section H, check for clinician signature. A verbal order documented with the clinician’s name, and signed and dated by the patient’s nurse or social worker is acceptable.
    - Comfort Measures Only: Use medication by any route, positioning, wound care and other measures to relieve pain and suffering. Use oxygen (including CPAP), oral suction and manual treatment of airway obstruction as needed for comfort.
    - Limited Additional Interventions: Includes care described in Sections B-E. Use medical treatments and IV fluids as indicated.
    - Full treatment: Includes care described in sections B-E. Use defibrillation and other interventions as indicated.

PEARLS

- A DNR Order (Section A of the DNR/COLST form) only precludes efforts to resuscitate in the event of cardiopulmonary arrest and does not affect other therapeutic interventions that may be appropriate for the patient. (Sections B through H of the COLST form address other interventions).

- EMS providers and other health care professionals must honor a DNR order or a DNR identification unless it is believed in good faith, after consultation with the patient, agent or guardian, where possible and appropriate:
  - That the patient wishes to have the DNR Order revoked if the Order is based on informed consent, or
  - That the patient with the DNR identification or order is not the individual for whom the DNR order was issued.

- A health care provider shall honor in good faith an out-of-state DNR order, orders for life sustaining treatment, or out-of-state DNR identification if there is no reason to believe that what has been presented is invalid.

- Statutory requirements for DNR or DNR/COLST require that the order be signed by the patient’s clinician, or a verbal order documented, and signed and dated by the patient’s nurse or social worker, and include the name of the patient agent guardian or other individual giving informed consent and their relationship to the patient.

- In the absence of a valid DNR or DNR/COLST order, neither a spouse nor a healthcare agent/durable power of attorney may direct you to withhold resuscitation in the event of a cardiac arrest. **Contact Medical Direction for guidance.**

- Photocopies and faxes of signed DNR/COLST forms are legal and valid.

- An Advanced Directive (formerly referred to as Living Will) is different than DNR/COLST. An Advance Directive is completed by the patient, allows for nuances and is not honored in an out of hospital emergency. The DNR/COLST order is completed by a clinician, is black and white and is honored in an out of hospital emergency.

- **Contact Medical Direction** for circumstances not specifically covered by this protocol. Document in SIREN any actions taken or not taken based on a DNR/COLST order.
Do Not Resuscitate (DNR)/Clinician Orders
For Life Sustaining Treatment (COLST)

INSTRUCTIONS FOR CLINICIANS
COMPLETING VERMONT DNR/COLST FORM
(DO NOT RESUSCITATE ORDER/Clinician ORDERS FOR LIFE SUSTAINING TREATMENT)

Completing DNR/COLST
- The DNR/COLST form must be completed and signed by a health care clinician based on patient preferences and medical indications. A clinician is defined as a medical doctor, osteopathic physician, advance practice registered nurse or physician assistant. 18 V.S.A. § 9701(5). Verbal orders are acceptable with follow-up signature by the clinician in accordance with facility/community policy.
- Photocopies and Faxes of signed COLST forms are legal and valid; use of original is encouraged.

Special requirements for completing the DNR section of COLST (18 V.S.A. §§9708, 9709)
- A DNR order may be written on the basis of either informed consent or futility. Complete section A-2 for informed consent; Section A-3 for futility.
- An order based on informed consent must include the name of the patient, agent, guardian, or other individual giving informed consent. Beginning January 2018, the name of the patient, agent, guardian, or surrogate.
- An order based on futility must include a certification by the clinician and a second clinician that resuscitation would not prevent the imminent death of the patient, should the patient experience cardiopulmonary arrest.
- If patient is in a health care facility, the clinician must certify that the requirements of the facility’s DNR protocol as required by 18 V.S.A. § 9709 have been met.
- The physician shall authorize issuance of a DNR identification to the patient
- Clinician must certify that clinician has consulted or made an attempt to consult with the patient, and the patient’s agent or guardian.

Using DNR Order - Section A CPR/DNR - 18 V.S.A. § 9708(i) and (l)
- A DNR Order (Section A of the DNR/COLST form) only precludes efforts to resuscitate in the event of cardiopulmonary arrest and does not affect other therapeutic interventions that may be appropriate for the patient. (Sections B through H of the COLST Form address other interventions.)

Health care professionals, health care facilities, and residential care facilities must honor a DNR order or a DNR Identification unless the professional or facility believes in good faith, after consultation with the patient, agent or guardian, where possible and appropriate:
- that the patient wishes to have the DNR Order revoked, or
- that the patient with the DNR Identification or order is not the individual for whom the DNR order was issued.

Documentation of basis for belief in medical record is required.

Using COLST (Sections B through H)
- Any section of COLST not completed indicates that the COLST order does not address that topic. It may be addressed in a patient’s advance directive, or in other parts of the medical record.
- Oral fluids and nutrition must always be offered if medically feasible.
- When comfort cannot be achieved in the current setting, the person, including someone with “comfort measures only”, may be transferred to a setting able to provide comfort.
- Treatment of dehydration is a measure that may prolong life. For a patient who desires IV fluids the order should indicate “Limited Interventions” or “Full Treatment.”
- A patient with or without capacity, or another person authorized to provide consent, may revoke the COLST order at any time and request alternative treatment. Exceptions may apply. See, 18 V.S.A. § 9707(b) or 18 V.S.A. § 9707(g)
- Photocopies and Faxes of signed DNR/COLST forms are legal and valid; use of original is encouraged.

Documenting Clinician’s Verbal Order (Sections A6 & II)
To document a clinician’s verbal order for a DNR/COLST:
- The patient’s nurse or social worker must print the clinician’s name in Section A6 for DNR and/or Section H for COLST and write “Verbal Order” on the clinician signature line.
- The nurse or social worker documenting the verbal order must also sign and date the form.
- A duplicate DNR/COLST must be completed and sent to the clinician for an original signature.
- At the earliest convenience, the order with the original signature must be returned to the patient to replace the previously documented verbal order.

Reviewing DNR/COLST
This form should be reviewed periodically and a new form completed if necessary when:
  1. The patient is transferred from one care setting or care level to another, or
  2. There is a substantial change in the patient’s health status, or
  3. The patient’s preferences change, or
  4. At least annually, but more frequently in residential or inpatient settings.

Voiding DNR/COLST
To void this form or a part of it, draw a line through each page or section to be voided and write “VOID” in large letters.

Vermont EMS has taken extreme caution to ensure all information is accurate and in accordance with professional standards in effect at the time of publication. These protocols, policies, or procedures MAY NOT BE altered or modified.
### Do Not Resuscitate (DNR)/Clinician Orders for Life Sustaining Treatment (COLST)

**Patient Name / D.O.B.**

<table>

</tr>
</tbody>
</table>

For patient who is breathing and/or has a pulse, GO TO SECTION B - G, PAGE 2 FOR OTHER INSTRUCTIONS. CLINICIANS MUST COMPLETE SECTIONS A-1 THROUGH A-5

#### A-1 Basis for DNR Order
- Informed Consent - Complete Section A-2
- Futility - Complete Section A-3

#### A-2 Informed Consent
Informed Consent for this DO NOT RESUSCITATE (DNR) Order has been obtained from:

- Name of Person Giving Informed Consent (Can be Patient)
- Relationship to Patient (Write “self” if Patient)
- Signature (If Available)

#### A-3 Futility (required if no consent)
- ☐ I have determined that resuscitation would not prevent the imminent death of this patient should the patient experience cardiopulmonary arrest. Another clinician has also so determined:

- Name of Other Clinician Making this Determination (Print here)
- Signature of Other Clinician

- Dated: __________________

#### A-4 Facility DNR Protocol (required if applicable)
- This patient is ☐ is not ☐ in a health care facility or a residential care facility.

- Name of Facility: __________________

- If this patient is in a health care facility or a residential care facility, the requirements of the facility’s DNR protocol have been met ________ (Initial here if protocol requirements have been met.)

#### A-5 DNR Identification (optional)
- I have authorized issuance of a DNR Identification (ID) to this patient. Form of ID: __________________

#### A-6 Clinician Certifications and Signature for CPR/DNR (required)
- I have consulted, or made an effort to consult with the patient and the patient’s agent or guardian.

- Patient’s Agent or Guardian: __________________
- Address or Phone: __________________
- I certify that I am the clinician for the above patient, and I certify that the above statements are true.

- Signature of Clinician: __________________
- Printed Name of Clinician: __________________

- Dated: __________________

---

**GIVE COPY TO PATIENT AND REPRESENTATIVE**
**SEND FORM WITH PATIENT WHENEVER TRANSFERRED OR DISCHARGED**
