Data from the Statewide Incident Reporting Network (SIREN) and the Vermont EMS Office were analyzed for COVID-19 topics of interest for the week of April 19, 2020 – April 25, 2020. Topics of interest include:

- Assessing the impacts of COVID-19 on the Vermont EMS system, including reduced call volume.
- Measuring the PPE consumption (“burn rate”) in Vermont EMS.
- Evaluating potential EMS COVID-19 calls through supplemental questions.

The data in this summary are preliminary and subject to change.

**EMS Call Volume**

Vermont EMS agencies have observed a significant decrease in call volumes for all response types, particularly 911 calls, interfacility and medical transports, mutual aid responses, and intercepts.

The graphs below display call volume data for 2020 compared to the 2015-2019 historical average for Vermont ambulance agencies.
Vermont Emergency Medical Services Prehospital Data from SIREN:
Total Call Volume Documented by Vermont Ambulance Agencies: All Response Types
April 1 - April 25, 2020 vs. 2015 - 2019 Historical Average

Vermont Emergency Medical Services Prehospital Data from SIREN:
911 and Total Call Volume Documented by Vermont Ambulance Agencies
April 1 - April 25, 2020 vs. April 1 - April 25, 2019

*First response agency data were excluded from analysis. This is to account for the increase in the number of first response agencies reporting data into SIREN as time progresses compared to the number of agencies that reported data into SIREN historically.

**Numbers may be underreported due to potential lag in reporting.
Disposable PPE Use by Vermont Ambulance and First Response Agencies

Measuring the PPE consumption rate, also referred to as the “burn rate”, helps the state and EMS agencies plan and optimize the use of PPE for response to COVID-19. The burn rate can help the state better understand the specific resource needs that exist and help the state advocate for PPE resources at the federal level. This information can be used to estimate how long the remaining supply of PPE will last, based on the average consumption rate, and can help make projections for future needs.

<table>
<thead>
<tr>
<th>Documented Amount of Disposable PPE</th>
<th>Week</th>
<th>Cumulative</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>April 19 - April 25, 2020</td>
<td>April 5 - April 25, 2020</td>
</tr>
<tr>
<td>Face Mask</td>
<td>432</td>
<td>1,001</td>
</tr>
<tr>
<td>Face Shield</td>
<td>199</td>
<td>410</td>
</tr>
<tr>
<td>Gloves</td>
<td>623</td>
<td>1,433</td>
