Table 1A - Hospital Pricing of Top 2022 Inpatient Diagnoses - Gross Charges

These are hospital gross charges only. Physician charges are NOT included. Charges displayed include each community hospital's top inpatient diagnoses by volume for the period of 10/1/2021 to 9/30/2022. Because each patient receives treatment based on their individual needs, the gross charge to each patient will vary. Hospital System Number of Cases and Average Gross Charges include all hospitals. For individual hospitals, charges for diagnoses having fewer than 15 cases are excluded. Blanks in the table indicate that the hospital has fewer than 15 cases for that diagnosis or the hospital does not admit patients with that particular diagnosis. The hospital, however, may admit patients with similar diagnoses under a different code which may not be shown. Treating a given diagnosis may entail more than one procedure. Please call the hospital for more information.

* "Major Diagnostic Category" (MDC) is a grouping of similar MS-DRGs, such as all those affecting a given organ system of the body.

"No data" indicates that no diagnosis in that particular grouping meets the minimum limits based on the methodology described above.

Data source: the Vermont Uniform Hospital Discharge Data Sets as of March 2024. Please see the Act 53 Pricing FAQs for more information.

¹ Based on "Medicare Severity - Diagnostic Related Group" (MS-DRG), a code that defines an inpatient diagnosis. Treating a given diagnosis may entail more than one procedure.

Major Diagnostic Category (MDC) is a grouping of similar MS DRGs, such as all those affecting a given organ system of the body.

² System Number of Cases includes the number of cases for all hospitals with charges. Records with zero charges are not included.

³ System Average Gross Charge is an average based on all hospital cases with charges.
