

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

### Medical/Surgical Unit

The Medical/Surgical Unit has 47 licensed beds and cares for adult patients. Types of services provided in this setting include care of people with general medical and surgical problems, heart monitoring, end-of-life care, palliative care, and rehabilitative care.

#### Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

## Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 60.86%.

Med/Surg Unit

## Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2014 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

Med/Surg 2014 - 2024

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

### Women & Children's Unit

The Women and Children's Unit has 12 licensed beds. Six of these beds are LDRP (Labor, Delivery, Recovery, and Post-Partum) which allow the laboring mother to be admitted to the same room in which she will spend her time at Central Vermont. The other six beds are used for pediatric patients who require inpatient care, or for female patients who had or will have surgery. There is a minimum of two RNs who are trained as Labor Nurse, and two in Neonatal Resuscitation Procedures, scheduled and available in the unit at all times.
