

How to bill Medicare for vaccines

- Medicare has a [handout \(linked\)](#) that describes the reimbursement process for Medicare Part D vaccines. Page 5 specifically looks at out-of-network providers and the two options for reimbursement. The first option is to use a web-assisted portal to submit the out-of-network claim to the Part D plan. At several national meetings, several other states' Immunization Programs have mentioned using TransactRx. The second option is for the provider or patient to reach out to the insurer to get a vaccine-specific notice (includes information on vaccine coverage authorization, billing instructions, patient cost-sharing and payment rates).

With auditing the senso node, is taking temps on paper instead no longer allowed? as in we MUST audit nodes in senso daily

- Yes auditing your node has replaced paper logs - if your practice has a requirement to do paper logs that is fine but we require senso audit nodes and paper is not accepted unless there is an issue with senso at a specific time.
