RADIOLOGIST ASSISTANT PROTOCOL

A protocol means a written document detailing those areas of medical practice including duties and medical acts, delegated to the Radiologist Assistant by the supervising physician for whom the physician is qualified by education, training, and experience. At no time shall the protocol of the Radiologist Assistant exceed the normal scope of either the primary or secondary supervising physician(s) practice.

Radiologist Assistants practice medicine with physician supervision. Radiologist Assistants may perform those duties and responsibilities, including the prescribing and dispensing of medical devices that are delegated by their supervising physician(s).

Radiologist Assistants shall be considered the agents of their supervising physician(s) in the performance of all practice-related activities, including but not limited to the ordering of diagnostic, therapeutic, or other medical services.

It is the obligation of each team of physician(s) and the Radiologist Assistant(s) to ensure that the written scope of practice submitted to the Board for approval clearly delineates the role of the Radiologist Assistant in the medical practice of the supervising physician. This should cover at least the following categories:

- **Narrative:** A brief description of the practice setting, the types of patients and patient encounters common to this practice and a general overview of the role of the Radiologist Assistant in that practice.
- **Supervision:** A detailed explanation of the mechanisms for on-site physician supervision and communication, back-up and secondary supervising physician utilization. Included here should be a description of the method of transport and back-up procedures for immediate care and transport of patients who are in need of emergency care when the supervising physician is not on premises. This explanation should include issues such as, ongoing review of the Radiologist Assistant's activities, retrospective chart review, co-signing of patient charts, and utilization of the services of non-supervising physicians and consultants.
- **Sites of Practice:** A description of any and all practice sites (i.e. office, clinic, outpatient, hospital inpatient, industrial sites, schools, etc.). For each site, include a description of the RA's activities.
- **Tasks/Duties:** A list of the RA's tasks and duties in the supervising physician's scope of practice.

This list should express a sense of involvement in the level of medical care in that practice. The supervising physician may only delegate those tasks for which the Radiologist Assistant is qualified by education, training, and experience to perform. Notwithstanding the above, the Radiologist Assistant should initiate emergency care when required while accessing back-up assistance. At no time should a particular task assigned to the RA fall outside of the scope of practice of the supervising physician.
