This institution is an equal opportunity provider.

DURING PREGNANCY Planning to feed your baby	THE FIRST WEEKS AT HOME Nursing baby is easy & natural, but challenges are common	MY GOAL My goal is to feed my baby my milk for months.
 Learn about the importance of feeding your baby your milk. Discuss your plans for feeding your baby with your health care provider(s). Prepare for lifestyle changes, such as quitting smoking, drinking, or using substances, and find support for these changes. Connect with a WIC peer counselor or other breastfeeding/chestfeeding support before the birth. 	 Hold your baby skin-to-skin as much as possible. Contact your health care provider or lactation consultant if your baby has difficulty latching on or if your nipples are sore. Sleep or rest when your baby sleeps. Ask for help with housework and child care if needed. 	WELCOME BABY! Baby's name: Birthday: Time of birth:
 Check with your insurance to see if breastfeeding classes, lactation consults, or breast pumps are covered. Nursing is normal and natural, but you and your baby may need help as you learn how to do it. WIC can help if there are challenges. 	THE NEXT FEW MONTHS Preparing to spend time away from your baby Learn how to express, collect, and store milk. Talk with your employer about supporting your infant feeding goals and milk expression after returning to work.	Birth weight: Discharge weight: Baby's weight at check-up 2 days after discharge: (It is common to lose up to 7% from birth)
PREPARING FOR THE BIRTH Getting off to a great start Talk to your partner, family, and friends about how you plan to feed your baby your milk and for how long. Learn about birth options and how they will effect infant feeding.	 Choose a child care provider who understands and supports the importance of offering expressed milk. Practice ways to nurse your baby if you are not comfortable feeding in front of others. 	Baby's second week weight:
 Attend a prenatal breastfeeding/chestfeeding class. Watch videos at home with your family to prepare for feeding your baby. 	WHEN TO CHECK WITH A DOCTOR OR LACTATION CONSULTANT: △ My baby acts fussy when we nurse and does not seem satisfied after	Health care provider:Phone:
THE HOSPITAL STAY Making the most of your hospital stay ☐ Hold your baby skin-to-skin right after birth. ☐ Feed your baby at the breast/chest within the first hour. ☐ Express colostrum (first milk) if your baby does not latch in the first hour. ☐ Express your own or request pasteurized donor human milk if your baby	most feedings. \(\times \) My baby is not nursing at least 8 times every 24 hours. \(\times \) My nipples hurt during feeding, even after my baby is first latched on. \(\times \) I can't hear my baby gulping or swallowing, or I can't tell. \(\times \) I think I'm not making enough milk. \(\times \) I think my baby isn't gaining weight.	Lactation support provider: Phone: Strong Families Vermont home visitor:
needs supplemental human milk. Keep your baby in your room in the hospital ("room-in") Limit visitors so you can rest and learn how to nurse your baby. Call for help if your baby has trouble latching.	SIGNS THAT FEEDING IS GOING WELL & MAKING ENOUGH MILK FOR BABY: My baby is nursing at least 8-12 times every 24 hours. My baby is having 3-4 poops and 6-8 wet diapers each day. I can hear my baby gulping or swallowing at feedings. My nipples do not hurt when my baby nurses. My baby is receiving only my milk.	WIC peer counselor (if available): Phone:
