Overdose Data to Action Success Stories

Questions and Prompts

Challenge

1) Describe the public health problem that you sought to address.

2) List all the data sources that were used to identify the problem and the population of focus.

Approach

1) Describe the population of focus.

2) Describe how the data were used to inform the intervention implemented.

3) WHERE and WHEN did the intervention take place?

4) HOW did the intervention address the Challenge?

5) WHO was involved, including major partners?

6) WHAT innovative approaches and culturally tailored activities were used to address health equity?

Results

1) What happened as a result of the work you did?

2) Why is that result important? (Describe the “so what?”)

3) What are short-term, intermediate, or long-term outcomes that demonstrate how the intervention had an impact (e.g., how many people were reached, what practices/behaviors changed, how much money was saved, if any policies were changed or developed, how the Challenge was addressed)? Please refer to your logic model and quantify your outcomes when possible.
