

# EMS System Governance and Organization

A conceptual plan under development by the EMS Advisory Committee

# Recommendations for a Statewide EMS System

## Objective

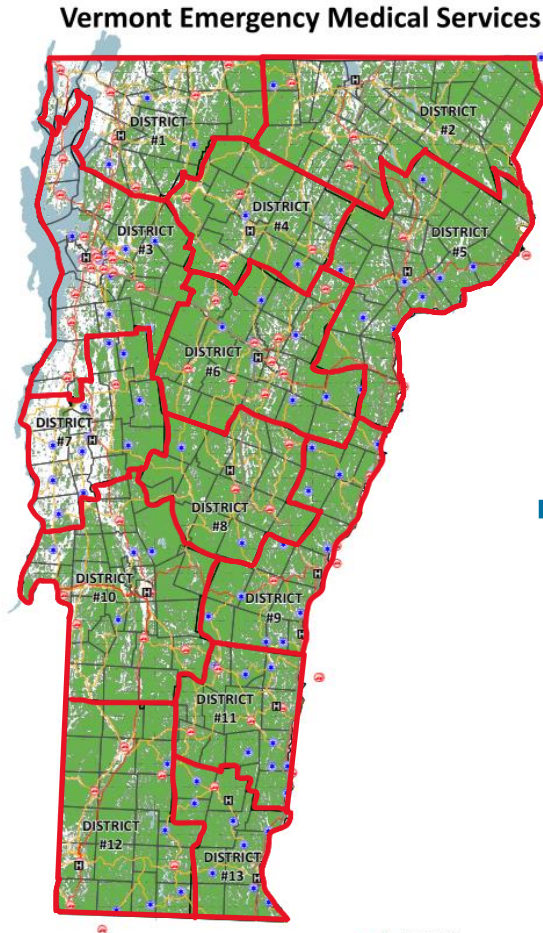

A statewide EMS system that provides safe, effective, and accountable systems of care and specialized transportation.

## Goals

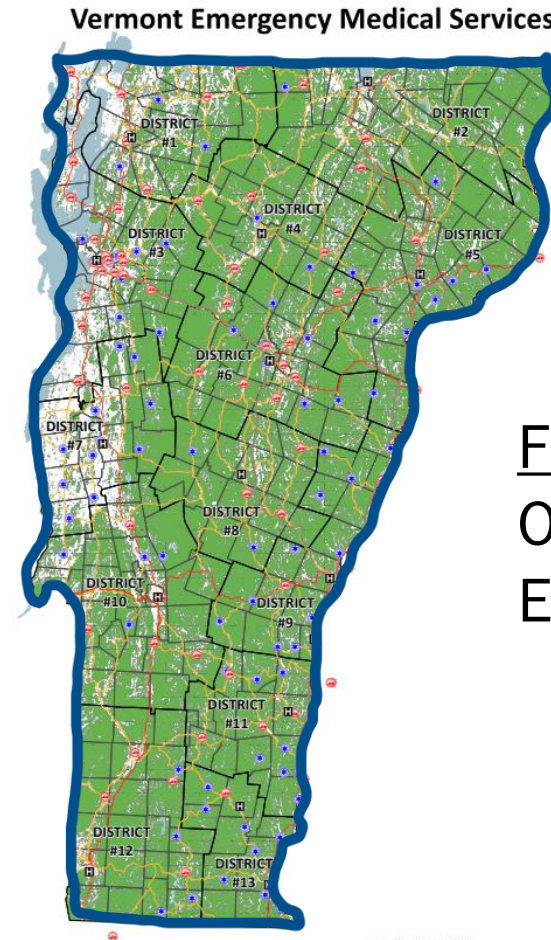

1. A patient centered EMS system
2. An integrated, multi-layered structure
3. Evolve and strengthen the public private partnership between the state and local officials

# Remove Borders to Create a Statewide EMS System

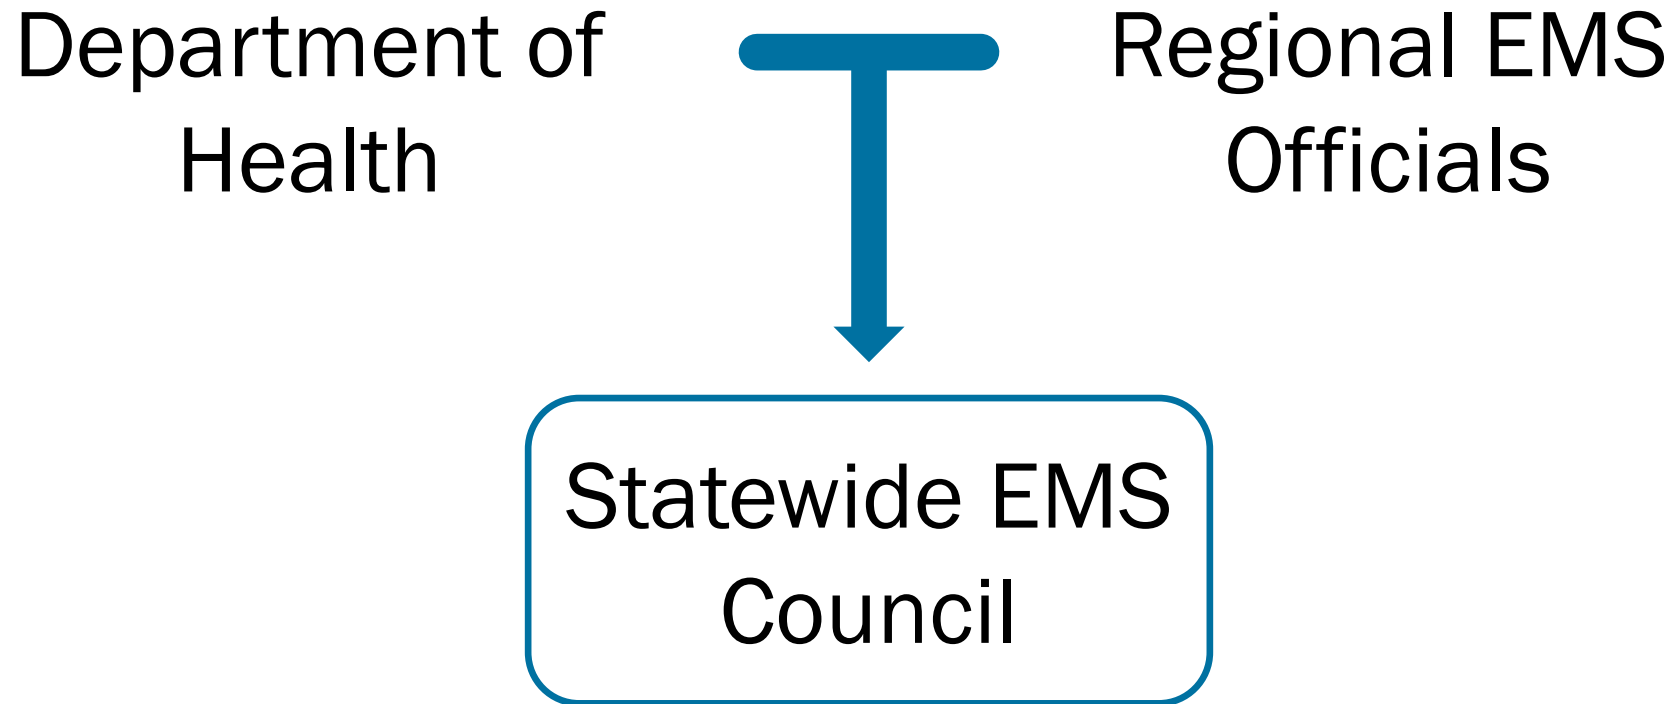

Today  
13  
Independent  
EMS Districts

Future  
One statewide  
EMS system

# A Public Private Partnership

# The Statewide EMS Council Core Tenets

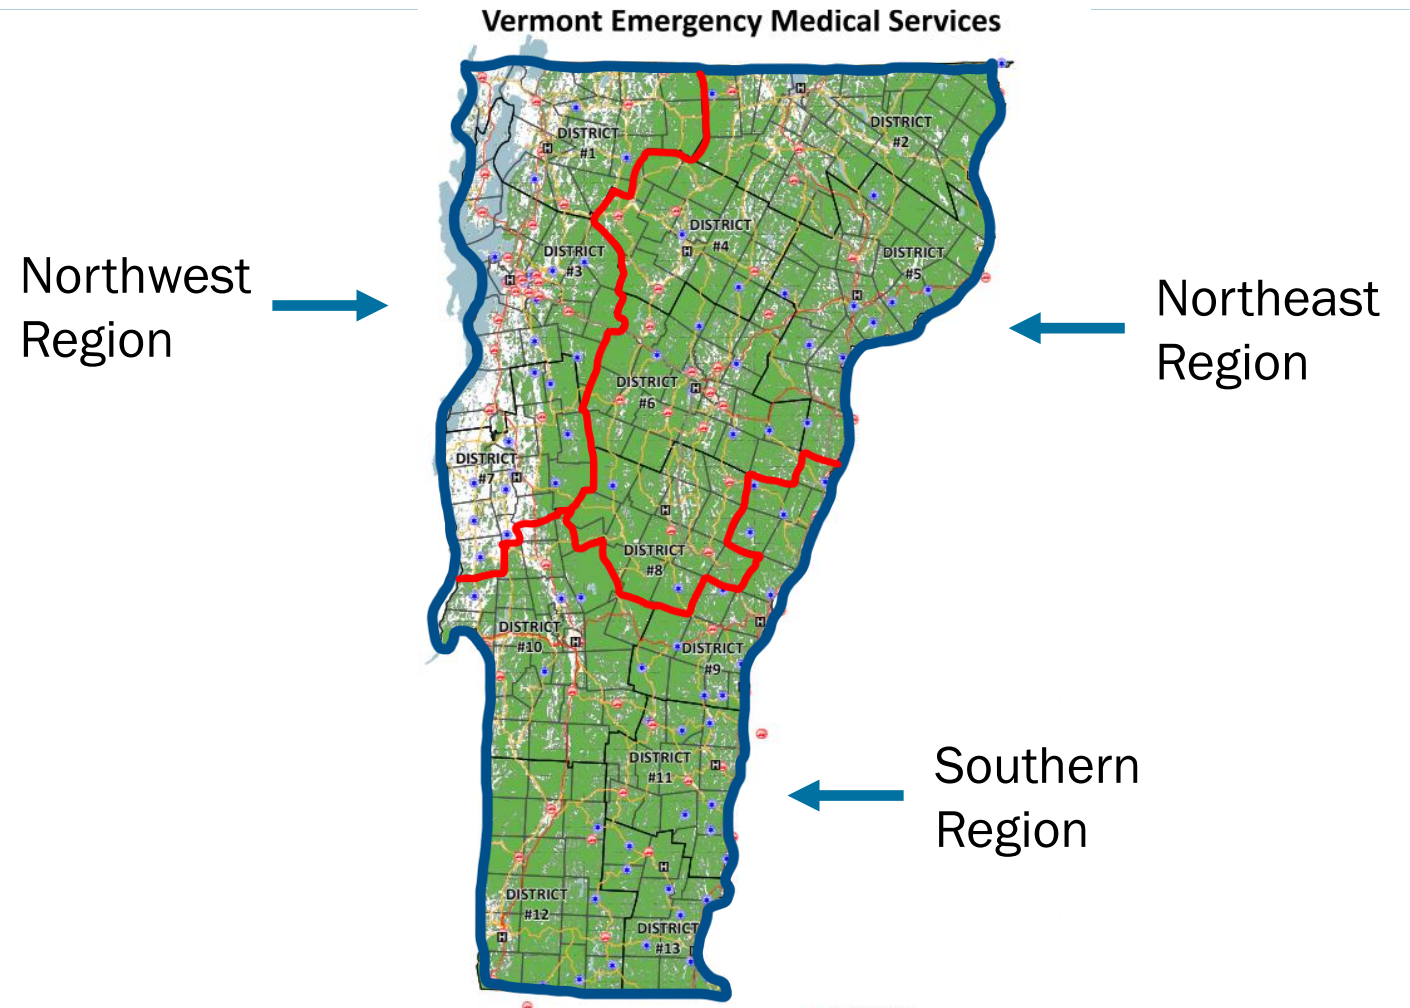

# Statewide Council with Regional Representation

The statewide EMS Council is comprised of regional representatives, EMS leaders, state regulators, EMS clinicians, physicians and nurses, and the community.

Regions are the primary sub-unit of the council.

Regional makeup mirrors that of EMS districts.
