

Patient's Perspective of Care Survey Measures

2025 Hospital Report Card

The Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey is the first national, standardized, publicly reported survey of patients' perspectives of their hospital care. HCAHPS (pronounced "H-caps") is also known as the CAHPS Hospital Survey and allows valid comparisons to be made across hospitals

About star ratings

- Centers for Medicare & Medicaid Services (CMS) employs all survey responses in the construction of the HCAHPS star ratings.
- To receive star ratings, hospitals must have at least 100 completed surveys in a given four-quarter period.
- Responses to the survey items used in each measure are scored linearly, adjusted, rescaled, averaged across quarters and rounded to produce a 0-100 linear-scaled score.
- The linear scores are converted into the star ratings for the 10 HCAHPS measures.
- The star ratings for each of 10 HCAHPS measures are determined by applying a clustering algorithm to the individual measure scores. [More information on the star ratings is available online.](#)

CMS collects the following components to construct the ratings

- The star ratings from each of the [six HCAHPS composite measures](#) (nurse communication, doctor communication, responsiveness of hospital staff, pain management, communication about medicines, and discharge information.)
- A single star rating for the HCAHPS individual items.
- A single star rating for the HCAHPS global items.
- The eight-star ratings (six composite measure star ratings + star rating for individual items + star rating for global items) are combined as a simple average to form the HCAHPS summary star rating.

Springfield Hospital ³	94%
University of Vermont Medical Center	97%

2. Grace Cottage Family Health & Hospital's number of cases/patients are too small to report.

3. For Springfield fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.

Doctors communicate well with patients more than 94% of the time.

2. Grace Cottage Family Health & Hospital's number of cases/patients are too small to report.

3. For Springfield fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.

Patients receive help from hospital staff quickly, more than 89% of the time.

2. Grace Cottage Family Health & Hospital's number of cases/patients are too small to report.

3. For Springfield fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.

Staff explain medicines to patients before giving them more than 78% of the time.

2. Grace Cottage Family Health & Hospital's number of cases/patients are too small to report.

3. For Springfield fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.

Patient rooms and bathrooms were kept clean more than 83% of the time.

2. Grace Cottage Family Health & Hospital's number of cases/patients are too small to report.

3. For Springfield fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.

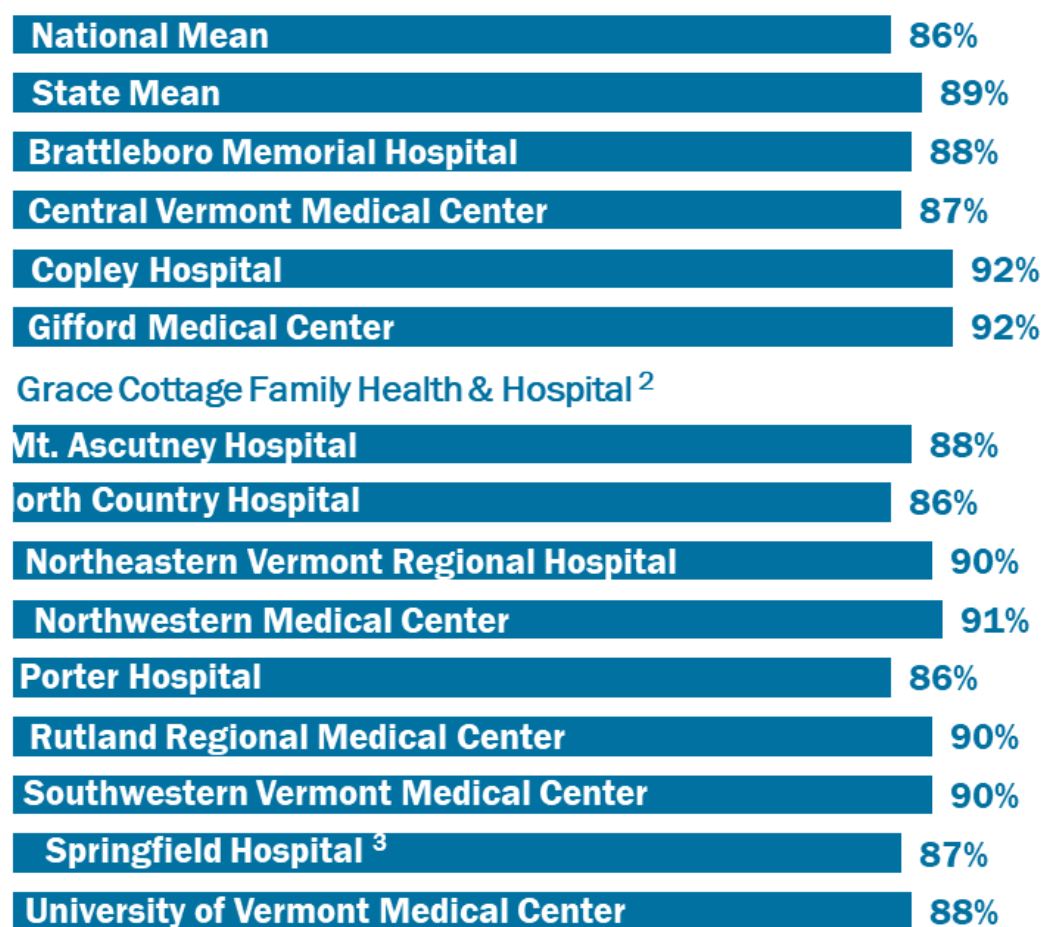

Area around patients' rooms were kept quiet at night more than 82% of the time.

2. Grace Cottage Family Health & Hospital's number of cases/patients are too small to report.

3. For Springfield fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.

Patients were given information about what to do during their recovery time more than 86% of the time.

2. Grace Cottage Family Health & Hospital's number of cases/patients are too small to report.

3. For Springfield fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.

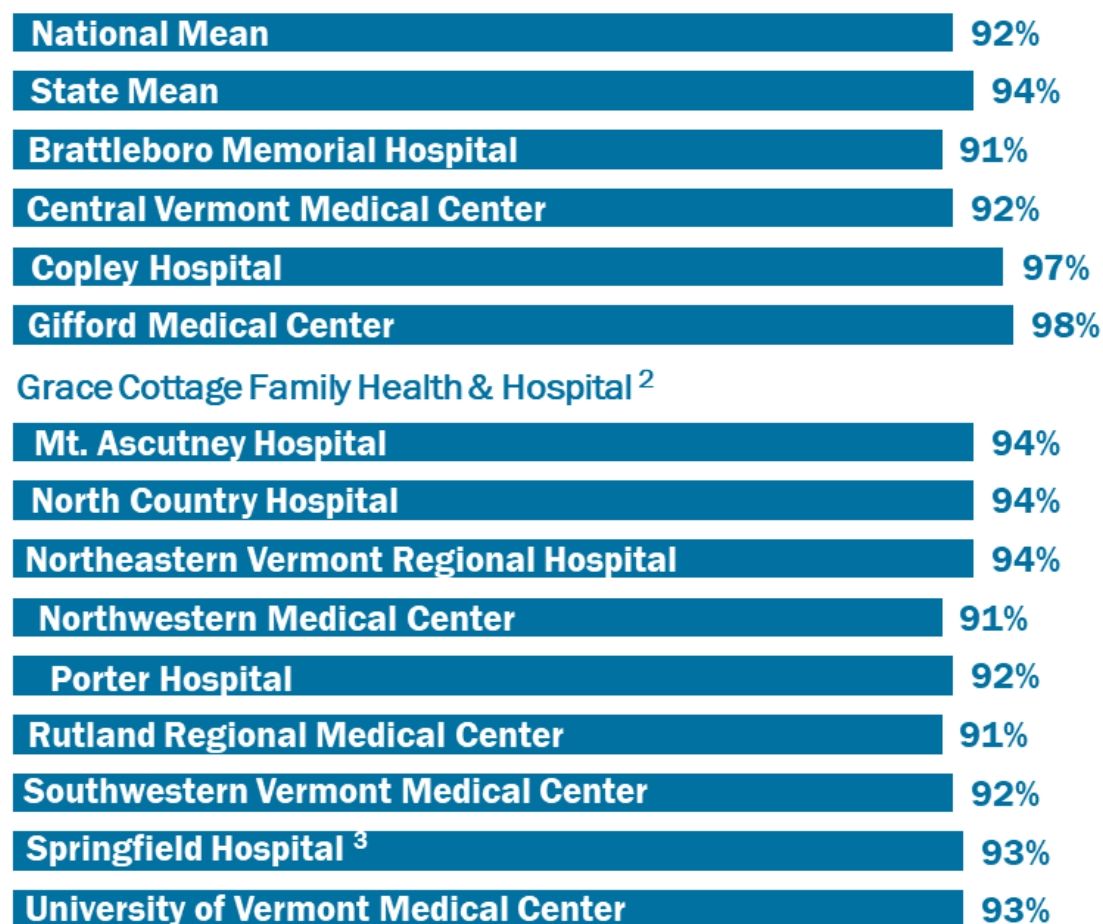

Patients understood the type of care they would need after leaving the hospital more than 93% of the time.
