

EDRS Login Experience Change

July 2026

When you log into the Electronic Death Registration System (EDRS) you will be prompted to enter the email address associated with your account instead of a username. The email associated with your account is the one you currently use when resetting your password. *If you do not know the email address associated with your account, or if your email address has changed and needs to be updated, please contact the Vital Records Office via email: EDRS@vermont.gov.*

This login change is part of a larger security improvement that includes the addition of multifactor authentication (MFA). MFA is an extra layer of security used to verify a user's identity and ensure that only authorized persons can access a protected data system. MFA requires users to enter a security code in addition to their password each time they log in to the EDRS.

You will need to set up MFA for your account and will be prompted to do so automatically when you log into the EDRS. You only need to set up MFA for your account once. After you have successfully set up MFA, you will need to enter a verification code in addition to your password each time you log into the system. Please note as part of the MFA setup you will be asked for your date of birth.

This security update will impact multiple Vermont Department of Health (VDH) applications, including:

- Immunization Registry (IMR)
- Developmental Screening Registry (DSR)
- Hearing Screening Registry (CHHS)
- Lead Screening Registry (HHLPS)
- Vaccine Inventory Management System (VIMS)
- Vital Records Applications:
 - Electronic Birth Registration System (EBRS),
 - Electronic Death Registration System (EDRS)
 - Vital Records Issuance Management System (VRIMS).

Below are the steps that you will need to follow to log into EDRS once MFA is required.

If you need help accessing or understanding this information, contact EDRS@vermont.gov.

HealthVermont.gov
802-863-7200

Step #1: Go to the EDRS page and click on the blue log in button

Welcome to the Electronic Death Registration System (EDRS)

Log in

Your login credentials have changed!

To access the EDRS application, you must log in using the email address associated with your account.

For enhanced data security, multifactor authentication (MFA) is now required.

If you have not set up MFA with another myVermont application, you will be prompted to do so the first time you log in.

Please visit the [MFA help page](#) for more information and set up guidance.

Note: If you already use MFA with another myVermont application, your MFA verification will remain the same.

When accessing the system make sure you are using a supported web browser, either Microsoft Edge or Mozilla Firefox, and allow pop-ups from the site, if prompted.

For questions or assistance, please contact the Vital Records Office, Monday through Friday from 7:45 am to 4:30 pm. For the quickest service, please email EDRS@vermont.gov.

Step #2: Enter the email address associated with your account

Log in to get started

Email address

[Privacy Policy](#)

[Accessibility](#)

Don't have an account? [Sign up](#)

Important!

Once MFA is enabled, **your account email address will become your username.**

You will need to enter your email address instead of your username each time you log into the EDRS.

Step #3: Next, you will be prompted to enter your password

Verify with your password

Password

Verify

[Forgot password?](#)

[Back to sign in](#)

Passwords must include:

- Minimum of 14 characters
- At least one number
- A combination of uppercase and lowercase letters
- At least one special character (&*!%@...)

Passwords cannot:

- Include the user's first or last name
- Repeat any of the past 24 passwords used.

Step #4: Set up multifactor authentication (MFA) for your account

After entering your username and password, a window will open with three available options for MFA set up. [Learn more about setting up Multifactor Authentication \(MFA\).](#)

Select your preferred MFA security method by clicking on the Set up button beneath your choice.

Follow the prompts provided to complete MFA set up.

The screenshot shows the 'Set up security methods' page for a Vermont Department of Health account. At the top is the Vermont logo. Below it, the title 'Set up security methods' is followed by the email address 'vdhtestuser1@gmail.com'. A paragraph explains that the user can select an MFA option to proceed, or select additional options for future logins. Below this, the section 'Required now' lists three options: 'Phone - Text or Voice', 'Authenticator Apps', and 'Okta Verify'. Each option has a 'Set up' button. At the bottom, there is a link to 'Back to sign in'.

Set up security methods

vdhtestuser1@gmail.com

Select an MFA option to proceed. If you have already selected one for your myVermont account, you can select additional for more options during future log ins, or you can click continue to proceed.

Required now

-  Phone - Text or Voice
Verify with a code sent to your phone
[Set up](#)
-  Authenticator Apps
Enter a temporary code generated from authenticator apps including Google Authenticator, and Microsoft Authenticator.
[Set up](#)
-  Okta Verify
Okta Verify is an authenticator app, installed on your phone and used to prove your identity.
