2025 Vermont Youth Risk Behavior Survey

Addison Central Supervisory Union Results

The Vermont Department of Health would like to acknowledge the work and effort of all the schools, teachers and students who participate in the Youth Risk Behavior Survey each year.

We would especially like to thank the students and schools in Addison Central Supervisory Union who participated in the 2025 YRBS.

Participating High Schools
MIDDLEBURY UNION HIGH SCHOOL

Participating Middle Schools
MIDDLEBURY UNION MIDDLE SCHOOL

Copies of the questionnaires, state-wide reports, data briefs, and additional sub-state reports are available online. Visit the Vermont Department of Health YRBS website at: https://www.HealthVermont.gov/yrbs.

The Vermont Department of Health recognizes that many social, economic and environmental inequities made worse by structural oppression, marginalization and racism influence the data we collect and report. We are continuously working to better collect and share data that reflect the lived experiences of all Vermonters.

If you have questions or concerns or need help accessing or understanding this information, contact: AHS.VDHYRBS@vermont.gov

About the YRBS

The Youth Risk Behavior Survey (YRBS) is part of a national school-based survey that monitors the health-risk behaviors that contribute to the leading causes of death and disability among youth and young adults and high-priority health topics. These include:

- Behaviors that lead to injuries and violence
- Alcohol, Marijuana, and other drug use
- Tobacco use
- Unhealthy dietary behaviors
- Inadequate physical activity
- Sexual health
- Social determinants of health
- Youth assets

YRBS in Vermont

The Vermont Department of Health has conducted the YRBS in Vermont schools since 1993. We collaborate with the Agency of Education to administer the YRBS every two years during the spring semester at all public schools and select independent schools. Schools ending in 6th grade are not eligible to participate.

Methodology and Accuracy

The YRBS is designed to protect students' privacy. It's confidential, anonymous, and optional for students. When reporting data, we follow suppression rules to provide additional privacy. Data is suppressed when less than 50 students respond to a question or less than 5 students answer a question in a particular way.

Completion of the survey depends on a student's ability to read, understand, and complete the questionnaire on their own or with computer-assisted technology (e.g., screen readers). Students with very limited reading skills or significant intellectual or learning disabilities may not be fully represented in this data.

Additional information about the methodology has been described by the CDC and can be found online.at: https://www.cdc.gov/yrbs/index.html

How Accurate are the Results

Research shows that self-reported survey data from adolescents is as credible as self-reported data from adults. The anonymous survey design and survey environment encourage students to be honest and open.

Consistency checks, weights, and other internal checks are used to ensure the data is accurate and representative. For more information on survey reliability including "Do students tell the truth" is available on the Vermont Department of Health YRBS webpage at: https://www.HealthVermont.gov/yrbs

Understanding and Interpreting the Results

Statistical Differences

Throughout this report, statistically significant differences are noted. Statistical significance is calculated by comparing the 95% confidence intervals of two or more values. If the confidence intervals overlap, the percentages are not different. In other words, the two groups are not statistically different from one another. If the confidence intervals do not overlap, there is a statistical difference between the two groups.

A 95% confidence interval is a range of values and can vary due to the size of a particular population or how consistently students responded to an item. Sometimes, when comparing the responses of two or more groups, the overall percent may look very different, but the two numbers are not statistically different. Other times, the two values may be very close but differ statistically.

While this report notes statistical differences, we encourage you to consider meaningful differences: does the disparity merit a targeted intervention, show a real change in health, or otherwise mean something important to the community (statistics aside).

In this report, comparisons are made with the overall statewide rate. Statistical differences are noted in each table.

Data Suppression

For some questions, not enough students respond to be able to report an estimate. In those instances, a dot (.) indicating “too few students” is noted in the table. Reportable estimates include a numerator of at least 5 students and denominator of 50 or more students.

Using the YRBS

Engaging students, schools, and communities

The YRBS can detect changes in risk behaviors over time and identify differences among ages, grades, and genders. With these data, school and community organizations can focus prevention efforts and determine whether school policies and community programs are having the intended effect on student behaviors.

Think of the YRBS as a tool for starting discussions, for educating the community, for planning and evaluating programs, and for comparing Vermont students with other students nationwide.

Start the Conversation: Use the YRBS to begin a conversation with teens about the personal choices they make or about the health of their community. Ask them if the Results accurately reflect what they see happening around them. How do they explain the Results? From their perspective, what is or is not working? How would they promote healthy behaviors?

Increase Awareness: The YRBS provides an opportunity to break through "denial" and make community members aware of the risks that their young people face. It can also dispel myths and correct misinformation about the "average teenager." The YRBS can accentuate the positive and celebrate the fact that many students are abstaining from behaviors that endanger their health and their ability to succeed.

Plan and Evaluate Programs: The YRBS can serve as the basis of a community needs assessment. It can help identify strengths and weaknesses in communities and can inform strategies to address those weaknesses.

Remember to Look at the Positive Side: In most cases, the majority of adolescents are NOT engaging in risky behaviors. Although most of the charts examine the prevalence of risk behaviors, please do not forget about the percentage of adolescents who are NOT engaging in these behaviors.

Participate in Getting to Y: Getting to Y provides an opportunity for students to take a lead in bringing meaning to their own Youth Risk Behavior Survey data and taking steps to strengthen their school and community based on their findings. Schools and districts across the state form teams to analyze local level data, identify areas of strength and concern, and create a preliminary action plan. Through the Getting to Y program, students attend a training day where they learn tools and strategies to examine data, explore root causes, and create next action steps. In addition, teams plan and host a community dialogue event to share their executive summary with the school and community.

For more information on upcoming Getting to Y trainings, newsletters, and resources visit Getting to Y at: http://www.upforlearning.org/initiatives/getting-to-y

2025 Vermont Youth Risk Behavior Survey Report

High School Results

Demographics

Addison Central Supervisory Union	N
Overall	304

Sex	N	%
Male	143	49
Female	159	51

Grade	N	%
9th grade	112	27
10th grade	74	23
11th grade	60	24
12th grade	54	26

Race / Ethnicity	N	%
BIPOC	54	9
White non-Hispanic	248	91

Sexual Orientation & Gender Identity	N	%
LGBTQ+	74	25
Heterosexual Cisgender	217	75

Note: Students are not required to answer questions on the YRBS. Therefore, totals by specific demographics may not equal the overall total.
N = Unweighted number of students; % = Weighted percent

Demographics

IEP / 504 Plan Status	N	%
Have a current IEP or 504 plan	59	20
Do not have a current IEP or 504 plan	225	80

Note: Students are not required to answer questions on the YRBS. Therefore, totals by specific demographics may not equal the overall total.
N = Unweighted number of students; % = Weighted percent

Unintentional Injuries and Prevention

	Vermont %	SU %	Differences
Were asked by a doctor, dentist, or nurse if they used a tobacco product, among those who saw a doctor, past year	45	36	VT > SU
Had a sunburn, past year	69	75	SU > VT
Had a concussion from playing a sport or being physically active, past year	19	19	
Among those who rode a bicycle or skateboard or rollerbladed, rarely or never wore a helmet, past year	34	20	VT > SU

. = Too few students to report

Motor Vehicle Safety

	Vermont %	SU %	Differences
Rode in a car or other vehicle driven by someone who had been using marijuana, past 30 days	18	14	
Rode with a driver who had been drinking alcohol, past 30 days	16	14	

	Vermont %	SU %	Differences
Texted or e-mailed while driving a car or other vehicle, among students who drive, past 30 days	40	38	
Drove a car or other vehicle after using marijuana, among students who drive, past 30 days	10	8	
Drove a car or other vehicle when they had been drinking alcohol, among students who drive, past 30 days	6	4	

. = Too few students to report

Bullying and School Safety

	Vermont %	SU %	Differences
Were bullied, past 30 days	19	22	
Bullied someone else, past 30 days	12	10	
Were electronically bullied, past year	15	14	

	Vermont %	SU %	Differences
Carried a weapon on school property, past 30 days	5	4	
Were threatened or injured with a weapon on school property, past year	7	5	
Were in a physical fight, past year	17	19	

. = Too few students to report

Family and Neighborhood Violence & Other Risk Factors

	Vermont %	SU %	Differences
Felt that they were ever treated badly or unfairly because of their sexual orientation, gender or gender expression	19	23	SU > VT
Did not go to school because they felt unsafe at school or on their way to or from school, past 30 days	7	6	
Felt that they were ever treated badly or unfairly because of their race or ethnicity	17	17	

	Vermont %	SU %	Differences
Ever saw someone get physically attacked, beaten, stabbed, or shot in their neighborhood	15	11	VT > SU
Could obtain a loaded gun ready for them to fire without a parent or other adult's permission or supervision	38	32	VT > SU

. = Too few students to report

Sexual and Dating Violence

	Vermont %	SU %	Differences
Experienced physical dating violence, among those who dated in past year	12	9	
Were controlled or emotionally hurt by someone going out or dating, among those who dated in past year	28	24	
Were ever made to do sexual things they did not want to, by someone 5+ years older	7	8	

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Were bothered by feeling nervous, anxious, or on edge, most of the time or always, past year	29	24	
Felt sad or hopeless, past year	23	23	
Reported that their mental health was most of the time or always not good, past 30 days	25	26	

	Vermont %	SU %	Differences
Did something to purposely hurt themselves without wanting to die, past year	18	19	
Made a plan about how they would attempt suicide, past year	10	11	
Actually attempted suicide, past year	6	6	

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Most of the time or always feel that they are able to talk to an adult in their family or another caring adult about their feelings	59	62	
Most of the time or always feel that they are able to talk to a friend about their feelings	59	61	
Most of the time or always got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among those who needed help, past year	27	30	
Never or rarely got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among those who needed help	45	37	VT > SU

. = Too few students to report

Lifetime Substance Use

	Vermont %	SU %	Differences
Ever tried an electronic vapor product	26	21	VT > SU
Ever smoked a cigarette, even one or two puffs	17	17	
Ever drank alcohol	44	40	
Ever tried marijuana	30	25	

	Vermont %	SU %	Differences
First tried an electronic vapor product before age 13 years	7	6	
Smoked a cigarette before age 13 years	6	6	
Had their first drink of alcohol before age 13	12	12	
Tried marijuana for the first time before age 13 years	6	6	

	Vermont %	SU %	Differences
Ever took prescription pain medicine without a doctor's prescription or differently than how a doctor told them to use it	7	8	
Ever used cocaine	3	4	
Ever used inhalants	6	6	
Ever used heroin	3	3	
Ever used methamphetamines	2	3	

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Currently smoked cigarettes or cigars or used smokeless tobacco	10	12	
Currently smoked cigarettes or cigars or used smokeless tobacco or electronic vapor products	18	15	

	Vermont %	SU %	Differences
Smoked a cigarette, past 30 days	6	9	SU > VT
Currently used an electronic vapor product	14	13	
Currently used smokeless tobacco	6	8	
Currently smoked cigars	4	4	

	Vermont %	SU %	Differences
Currently took any prescription medication without a doctor's prescription or differently than how a doctor told them to use it	5	7	SU > VT
Currently drank alcohol	22	22	
Currently used marijuana	18	16	
Binge drank, past month	11	9	

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Usually got their electronic vapor products by buying them themselves in a convenience store, supermarket, discount store, or gas station, among current users	4	.	Too Few
Usually got their electronic vapor products from a friend or family member, among current users	56	.	Too Few
Used electronic vapor products because friends/family used them, among current users	19	19	
Used electronic vapor products mainly because they were curious about them, among current users	26	27	

	Vermont %	SU %	Differences
Currently used an electronic vapor product to vape marijuana, among students who used an electronic vapor product	63	.	Too Few
Currently used an electronic vapor product to vape marijuana, among students who used marijuana	69	.	Too Few

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Usually ate or drank marijuana, among current users	12	.	Too Few
Usually used marijuana by dabbing it, among students who used marijuana	3	.	Too Few
Usually used marijuana in some other way, among students who used marijuana	5	.	Too Few
Usually used marijuana by smoking it in a joint, bong, pipe, or blunt, among students who used marijuana	57	.	Too Few
Usually vaped marijuana, among current users	23	.	Too Few

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Attended school under the influence of alcohol or other illegal drugs, past year	9	7	

	Vermont %	SU %	Differences
Say if they wanted to get electronic vapor products, it would be sort of easy or very easy for them to get some	51	39	VT > SU
Say if they wanted to get alcohol, it would be sort of easy or very easy for them to get some	60	56	
Say if they wanted to get marijuana, it would be sort of easy or very easy for them to get some	47	38	VT > SU

	Vermont %	SU %	Differences
Think people greatly risk harming themselves if they use electronic vapor products regularly	44	52	SU > VT
Think people greatly risk harming themselves if they have five or more drinks of alcohol once or twice each weekend	38	40	
Think people greatly risk harming themselves if they use marijuana regularly	31	33	

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use electronic vapor products	89	92	SU > VT
Responded that their parents or guardians feel it would be wrong or very wrong for the student to drink alcohol	69	67	
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use marijuana	78	81	

	Vermont %	SU %	Differences
Think it is wrong or very wrong for someone their age to use electronic vapor products	74	81	SU > VT
Think it is wrong or very wrong for someone their age to drink alcohol	59	62	
Think it is wrong or very wrong for someone their age to use marijuana	64	70	SU > VT

. = Too few students to report

Sexual Health

	Vermont %	SU %	Differences
Were ever tested for human immunodeficiency virus (HIV)	8	4	VT > SU
Were tested for a sexually transmitted infection (STI) other than HIV, such as chlamydia or gonorrhea	7	4	VT > SU

	Vermont %	SU %	Differences
Had sexual intercourse for the first time before age 13 years	3	3	
Ever had sexual intercourse	34	28	VT > SU

. = Too few students to report

Current Sexual Activity

	Vermont %	SU %	Differences
Were sexually active, past 3 months	25	20	VT > SU

	Vermont %	SU %	Differences
Among sexually active students, drank alcohol or used drugs before last sexual intercourse	18	.	Too Few
Among sexually active students, used a condom during last sexual intercourse	48	.	Too Few

	Vermont %	SU %	Differences
Among sexually active students, used birth control pills before last sexual intercourse with opposite-sex partner	27	.	Too Few
Among sexually active students, did not use any method to prevent pregnancy during last sexual intercourse with an opposite-sex partner	7	.	Too Few
Among sexually active students, used a condom as the primary method to prevent pregnancy before last sexual intercourse with an opposite-sex partner	30	.	Too Few
Among sexually active students, used an IUD, or implant before last sexual intercourse with an opposite-sex partner	22	.	Too Few
Among sexually active students, used birth control pills; an IUD or implant; or a shot, patch, or birth control ring before last sexual intercourse with an opposite-sex partner	53	.	Too Few

. = Too few students to report

BMI and Weight Related Behaviors

	Vermont %	SU %	Differences
Had obesity	14	16	
Were Overweight	14	12	

	Vermont %	SU %	Differences
Described themselves as slightly or very overweight	29	30	
Were trying to lose weight	40	36	

. = Too few students to report

Physical Activity

	Vermont %	SU %	Differences
Were physically active at least 60 minutes per day on 5 or more days, past week	52	55	
Did not participate in at least 60 minutes of physical activity on at least 1 day, past week	13	11	
Were physically active at least 60 minutes per day on all 7 days, past week	28	27	

. = Too few students to report

Nutrition

	Vermont %	SU %	Differences
Did not eat breakfast, past week	14	8	VT > SU
Ate breakfast on 5 or more days, past week	49	60	SU > VT
Ate breakfast on all 7 days, past week	31	40	SU > VT

	Vermont %	SU %	Differences
Ate 5+ fruits/vegetables every day, past week	22	33	SU > VT

	Vermont %	SU %	Differences
Did not eat fruit, past week	7	6	
Ate fruit one or more times per day, past week	46	62	SU > VT
Ate fruit two or more times per day, past week	33	47	SU > VT
Ate fruit three or more times per day, past week	15	21	SU > VT

	Vermont %	SU %	Differences
Did not eat vegetables, past week	6	5	
Ate vegetables one or more times per day, past week	73	85	SU > VT
Ate vegetables two or more times per day, past week	41	58	SU > VT
Ate vegetables three or more times per day, past week	23	34	SU > VT

. = Too few students to report

Social Determinants of Health

	Vermont %	SU %	Differences
Experienced unstable housing, past year	4	3	
Reported their family sometimes, most of the time, or always worried that their food would run out before they got money to buy more	10	8	
Reported sometimes, most of the time, or always the food their family bought ran out and they did not have money to buy more	7	6	
Think their family's subjective social status is worse than other families	4	4	
Sometimes, most of the time, or always worried food would run out or had food run out, past year	11	9	

. = Too few students to report

Protective Factors & Other Behaviors

	Vermont %	SU %	Differences
Used social media several times a day or more	77	72	VT > SU
Do not use social media	9	10	

	Vermont %	SU %	Differences
Ate dinner at home with at least one of their parents or other adult family member on four or more days, past week	76	82	SU > VT
Did not eat dinner at home with at least one of their parents or other adult family member, past week	10	7	VT > SU
Ate dinner at home with at least one of their parents or other adult family member every day, past week	44	40	

. = Too few students to report

Protective Factors & Other Behaviors

	Vermont %	SU %	Differences
Strongly agree or agree that they feel close to people at their school	60	64	
Have at least one teacher or other adult in their school that they can talk to if they have a problem	74	73	
Strongly agree or agree that their school has clear rules and consequences for behavior	54	59	
Spend 10 or more hours participating in afterschool activities during an average week	23	25	
Report they are most likely to attend a 4-year college or university, a community college, or technical school after high school	70	77	SU > VT

	Vermont %	SU %	Differences
Strongly agree or agree that in their community they feel like they matter to people	53	59	SU > VT

. = Too few students to report

Had 1+ sunburns, past year	62	59	

	Vermont %	SU %	Differences
Have ever ridden in a car driven by someone who had been using marijuana	12	9	VT > SU
Did not always wear a seat belt	22	20	
Ever rode with a driver who had been drinking alcohol	16	9	VT > SU

. = Too few students to report

Physical Violence, Bullying and School Safety

	Vermont %	SU %	Differences
Felt that they were ever treated badly or unfairly in school because of their race or ethnicity	24	18	VT > SU
Felt that they were ever treated badly or unfairly because they are or people think they are lesbian, gay, bisexual, transgender, or questioning	20	20	
Have ever been teased or called names because of their weight, size, or physical appearance	55	49	VT > SU

	Vermont %	SU %	Differences
Were ever bullied on school property	46	45	
Were ever electronically bullied	27	24	VT > SU
Were bullied, past 30 days	26	25	
Bullied someone, past 30 days	12	10	VT > SU
Were ever in a physical fight	39	39	

	Vermont %	SU %	Differences
Did not go to school because they felt unsafe at school or on their way to or from school, past 30 days	11	9	VT > SU

. = Too few students to report

Family and Neighborhood Violence & Other Risk Factors

	Vermont %	SU %	Differences
Ever saw someone get physically attacked, beaten, stabbed, or shot in their neighborhood	15	10	VT > SU
Could obtain a loaded gun ready for them to fire without a parent or other adult's permission or supervision	37	31	VT > SU
Reported that an adult or person at least 5 years older than them ever made them do sexual things they did not want to do	4	3	VT > SU

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Reported that their mental health was most of the time or always not good	20	19	
Felt sad or hopeless every day for 2 weeks or more in a row, past year	22	17	VT > SU

	Vermont %	SU %	Differences
Ever did something to purposely hurt themselves without wanting to die	19	17	
Ever seriously thought about killing themselves	18	16	
Ever made a plan about how they would kill themselves	13	9	VT > SU
Ever tried to kill themselves	7	5	VT > SU

	Vermont %	SU %	Differences
Most of the time or always got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among students who needed help	36	39	SU > VT

	Vermont %	SU %	Differences
Would most likely talk to an adult in their school or an adult outside of school who is not a family member about their feelings, among students who felt sad/angry/anxious	6	.	Too Few

. = Too few students to report

Lifetime Substance Use

	Vermont %	SU %	Differences
Ever smoked a cigarette	6	3	VT > SU
Ever drank alcohol	16	14	VT > SU
Ever tried marijuana	6	4	VT > SU
Ever tried an electronic vapor product	10	6	VT > SU
Ever tried a flavored tobacco product	5	3	VT > SU

	Vermont %	SU %	Differences
Ever took prescription pain medicine without a doctor's prescription or differently than how a doctor told them to use it	6	6	
Ever used inhalants	5	6	

	Vermont %	SU %	Differences
Smoked a cigarette before age 11 years	3	.	Too Few
Drank alcohol for the first time before age 11 years	7	7	
Tried marijuana for the first time before age 11 years	2	.	Too Few
First tried an electronic vapor product before age 11 years	3	.	Too Few
First tried a flavored tobacco product before age 11	2	.	Too Few

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Currently smoked cigarettes or cigars or used smokeless tobacco	2	.	Too Few
Currently smoked cigarettes or cigars or used smokeless tobacco or electronic vapor products	5	.	Too Few

	Vermont %	SU %	Differences
Smoked a cigarette, past 30 days	1	.	Too Few
Used an electronic vapor product, past 30 days	5	.	Too Few
Used smokeless tobacco, past 30 days	1	.	Too Few
Smoked a cigar, past 30 days	1	.	Too Few

	Vermont %	SU %	Differences
Drank alcohol, past 30 days	4	2	VT > SU
Used marijuana, past 30 days	3	.	Too Few

	Vermont %	SU %	Differences
Used electronic vapor products mainly because they were curious about them	3	3	
Used electronic vapor products because they were feeling anxious, stressed, among current users	22	.	Too Few
Used electronic vapor products because friends/family used them, among current users	25	.	Too Few

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Say if they wanted to get electronic vapor products, it would be sort of easy or very easy for them to get some	18	13	VT > SU
Say if they wanted to get alcohol, it would be sort of easy or very easy for them to get some	34	32	
Say if they wanted to get marijuana, it would be sort of easy or very easy for them to get some	15	10	VT > SU

	Vermont %	SU %	Differences
Think it is wrong or very wrong for someone their age to use electronic vapor products	92	93	SU > VT

	Vermont %	SU %	Differences
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use electronic vapor products	95	96	
Responded that their parents or guardians feel it would be wrong or very wrong for the student to drink alcohol	88	90	SU > VT
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use marijuana	94	95	SU > VT

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Think people greatly risk harming themselves if they use electronic vapor products regularly	52	58	SU > VT
Think people greatly risk harming themselves if they have five or more drinks of alcohol once or twice each weekend	42	47	SU > VT
Think people greatly risk harming themselves if they use marijuana regularly	48	59	SU > VT

. = Too few students to report

Sexual Health

	Vermont %	SU %	Differences
Ever had sexual intercourse	4	2	VT > SU
Used a condom during last sexual intercourse, among students who had sexual activity	44	.	Too Few

. = Too few students to report

Physical Activity

	Vermont %	SU %	Differences
Were physically active at least 60 minutes per day on 5 or more days, past week	58	59	
Did not participate in at least 60 minutes of physical activity on at least 1 day, past week	11	11	
Were physically active at least 60 minutes per day on all 7 days, past week	34	34
