2025 Vermont Youth Risk Behavior Survey

Essex North Supervisory Union Results

The Vermont Department of Health would like to acknowledge the work and effort of all the schools, teachers and students who participate in the Youth Risk Behavior Survey each year.

We would especially like to thank the students and schools in Essex North Supervisory Union who participated in the 2025 YRBS.

Participating High Schools
CANAAN SCHOOLS

Participating Middle Schools
CANAAN SCHOOLS

Copies of the questionnaires, state-wide reports, data briefs, and additional sub-state reports are available online. Visit the Vermont Department of Health YRBS website at: https://www.HealthVermont.gov/yrbs.

The Vermont Department of Health recognizes that many social, economic and environmental inequities made worse by structural oppression, marginalization and racism influence the data we collect and report. We are continuously working to better collect and share data that reflect the lived experiences of all Vermonters.

If you have questions or concerns or need help accessing or understanding this information, contact: AHS.VDHYRBS@vermont.gov

About the YRBS

The Youth Risk Behavior Survey (YRBS) is part of a national school-based survey that monitors the health-risk behaviors that contribute to the leading causes of death and disability among youth and young adults and high-priority health topics. These include:

- Behaviors that lead to injuries and violence
- Alcohol, Marijuana, and other drug use
- Tobacco use
- Unhealthy dietary behaviors
- Inadequate physical activity
- Sexual health
- Social determinants of health
- Youth assets

YRBS in Vermont

The Vermont Department of Health has conducted the YRBS in Vermont schools since 1993. We collaborate with the Agency of Education to administer the YRBS every two years during the spring semester at all public schools and select independent schools. Schools ending in 6th grade are not eligible to participate.

Methodology and Accuracy

The YRBS is designed to protect students' privacy. It's confidential, anonymous, and optional for students. When reporting data, we follow suppression rules to provide additional privacy. Data is suppressed when less than 50 students respond to a question or less than 5 students answer a question in a particular way.

Completion of the survey depends on a student's ability to read, understand, and complete the questionnaire on their own or with computer-assisted technology (e.g., screen readers). Students with very limited reading skills or significant intellectual or learning disabilities may not be fully represented in this data.

Additional information about the methodology has been described by the CDC and can be found online.at: https://www.cdc.gov/yrbs/index.html

How Accurate are the Results

Research shows that self-reported survey data from adolescents is as credible as self-reported data from adults. The anonymous survey design and survey environment encourage students to be honest and open.

Consistency checks, weights, and other internal checks are used to ensure the data is accurate and representative. For more information on survey reliability including "Do students tell the truth" is available on the Vermont Department of Health YRBS webpage at: https://www.HealthVermont.gov/yrbs

Understanding and Interpreting the Results

Statistical Differences

Throughout this report, statistically significant differences are noted. Statistical significance is calculated by comparing the 95% confidence intervals of two or more values. If the confidence intervals overlap, the percentages are not different. In other words, the two groups are not statistically different from one another. If the confidence intervals do not overlap, there is a statistical difference between the two groups.

A 95% confidence interval is a range of values and can vary due to the size of a particular population or how consistently students responded to an item. Sometimes, when comparing the responses of two or more groups, the overall percent may look very different, but the two numbers are not statistically different. Other times, the two values may be very close but differ statistically.

While this report notes statistical differences, we encourage you to consider meaningful differences: does the disparity merit a targeted intervention, show a real change in health, or otherwise mean something important to the community (statistics aside).

In this report, comparisons are made with the overall statewide rate. Statistical differences are noted in each table.

Data Suppression

For some questions, not enough students respond to be able to report an estimate. In those instances, a dot (.) indicating “too few students” is noted in the table. Reportable estimates include a numerator of at least 5 students and denominator of 50 or more students.

Using the YRBS

Engaging students, schools, and communities

The YRBS can detect changes in risk behaviors over time and identify differences among ages, grades, and genders. With these data, school and community organizations can focus prevention efforts and determine whether school policies and community programs are having the intended effect on student behaviors.

Think of the YRBS as a tool for starting discussions, for educating the community, for planning and evaluating programs, and for comparing Vermont students with other students nationwide.

Start the Conversation: Use the YRBS to begin a conversation with teens about the personal choices they make or about the health of their community. Ask them if the Results accurately reflect what they see happening around them. How do they explain the Results? From their perspective, what is or is not working? How would they promote healthy behaviors?

Increase Awareness: The YRBS provides an opportunity to break through "denial" and make community members aware of the risks that their young people face. It can also dispel myths and correct misinformation about the "average teenager." The YRBS can accentuate the positive and celebrate the fact that many students are abstaining from behaviors that endanger their health and their ability to succeed.

Plan and Evaluate Programs: The YRBS can serve as the basis of a community needs assessment. It can help identify strengths and weaknesses in communities and can inform strategies to address those weaknesses.

Remember to Look at the Positive Side: In most cases, the majority of adolescents are NOT engaging in risky behaviors. Although most of the charts examine the prevalence of risk behaviors, please do not forget about the percentage of adolescents who are NOT engaging in these behaviors.

Participate in Getting to Y: Getting to Y provides an opportunity for students to take a lead in bringing meaning to their own Youth Risk Behavior Survey data and taking steps to strengthen their school and community based on their findings. Schools and districts across the state form teams to analyze local level data, identify areas of strength and concern, and create a preliminary action plan. Through the Getting to Y program, students attend a training day where they learn tools and strategies to examine data, explore root causes, and create next action steps. In addition, teams plan and host a community dialogue event to share their executive summary with the school and community.

For more information on upcoming Getting to Y trainings, newsletters, and resources visit Getting to Y at: http://www.upforlearning.org/initiatives/getting-to-y

2025 Vermont Youth Risk Behavior Survey Report

High School Results

Demographics

Essex North Supervisory Union	N
Overall	32

Sex	N	%
Male	12	53
Female	20	47

Grade	N	%
9th grade	11	34
10th grade	7	20
11th grade	8	25
12th grade	6	22

Race / Ethnicity	N	%
BIPOC	6	20
White non-Hispanic	26	80

Sexual Orientation & Gender Identity	N	%
LGBTQ+	<5	.
Heterosexual Cisgender	28	91

Note: Students are not required to answer questions on the YRBS. Therefore, totals by specific demographics may not equal the overall total.
N = Unweighted number of students; % = Weighted percent

Demographics

IEP / 504 Plan Status	N	%
Have a current IEP or 504 plan	6	20
Do not have a current IEP or 504 plan	23	80

Note: Students are not required to answer questions on the YRBS. Therefore, totals by specific demographics may not equal the overall total.
N = Unweighted number of students; % = Weighted percent

Unintentional Injuries and Prevention

	Vermont %	SU %	Differences
Were asked by a doctor, dentist, or nurse if they used a tobacco product, among those who saw a doctor, past year	45	.	Too Few
Had a sunburn, past year	69	.	Too Few
Had a concussion from playing a sport or being physically active, past year	19	.	Too Few
Among those who rode a bicycle or skateboard or rollerbladed, rarely or never wore a helmet, past year	34	.	Too Few

. = Too few students to report

Motor Vehicle Safety

	Vermont %	SU %	Differences
Rode in a car or other vehicle driven by someone who had been using marijuana, past 30 days	18	.	Too Few
Rode with a driver who had been drinking alcohol, past 30 days	16	.	Too Few

	Vermont %	SU %	Differences
Texted or e-mailed while driving a car or other vehicle, among students who drive, past 30 days	40	.	Too Few
Drove a car or other vehicle after using marijuana, among students who drive, past 30 days	10	.	Too Few

. = Too few students to report

Bullying and School Safety

	Vermont %	SU %	Differences
Were bullied, past 30 days	19	.	Too Few
Bullied someone else, past 30 days	12	.	Too Few
Were electronically bullied, past year	15	.	Too Few

	Vermont %	SU %	Differences
Carried a weapon on school property, past 30 days	5	.	Too Few
Were threatened or injured with a weapon on school property, past year	7	.	Too Few
Were in a physical fight, past year	17	.	Too Few

. = Too few students to report

Family and Neighborhood Violence & Other Risk Factors

	Vermont %	SU %	Differences
Felt that they were ever treated badly or unfairly because of their sexual orientation, gender or gender expression	19	.	Too Few
Did not go to school because they felt unsafe at school or on their way to or from school, past 30 days	7	.	Too Few
Felt that they were ever treated badly or unfairly because of their race or ethnicity	17	.	Too Few

	Vermont %	SU %	Differences
Ever saw someone get physically attacked, beaten, stabbed, or shot in their neighborhood	15	.	Too Few
Could obtain a loaded gun ready for them to fire without a parent or other adult's permission or supervision	38	.	Too Few

. = Too few students to report

Sexual and Dating Violence

	Vermont %	SU %	Differences
Experienced physical dating violence, among those who dated in past year	12	.	Too Few
Were controlled or emotionally hurt by someone going out or dating, among those who dated in past year	28	.	Too Few
Were ever made to do sexual things they did not want to, by someone 5+ years older	7	.	Too Few

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Were bothered by feeling nervous, anxious, or on edge, most of the time or always, past year	29	.	Too Few
Felt sad or hopeless, past year	23	.	Too Few
Reported that their mental health was most of the time or always not good, past 30 days	25	.	Too Few

	Vermont %	SU %	Differences
Did something to purposely hurt themselves without wanting to die, past year	18	.	Too Few
Made a plan about how they would attempt suicide, past year	10	.	Too Few
Actually attempted suicide, past year	6	.	Too Few

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Most of the time or always feel that they are able to talk to an adult in their family or another caring adult about their feelings	59	.	Too Few
Most of the time or always feel that they are able to talk to a friend about their feelings	59	.	Too Few
Most of the time or always got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among those who needed help, past year	27	.	Too Few
Never or rarely got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among those who needed help	45	.	Too Few

. = Too few students to report

Lifetime Substance Use

	Vermont %	SU %	Differences
Ever tried an electronic vapor product	26	.	Too Few
Ever smoked a cigarette, even one or two puffs	17	.	Too Few
Ever drank alcohol	44	.	Too Few
Ever tried marijuana	30	.	Too Few

	Vermont %	SU %	Differences
First tried an electronic vapor product before age 13 years	7	.	Too Few
Smoked a cigarette before age 13 years	6	.	Too Few
Had their first drink of alcohol before age 13	12	.	Too Few
Tried marijuana for the first time before age 13 years	6	.	Too Few

	Vermont %	SU %	Differences
Ever took prescription pain medicine without a doctor's prescription or differently than how a doctor told them to use it	7	.	Too Few
Ever used heroin	3	.	Too Few

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Currently smoked cigarettes or cigars or used smokeless tobacco	10	.	Too Few
Currently smoked cigarettes or cigars or used smokeless tobacco or electronic vapor products	18	.	Too Few

	Vermont %	SU %	Differences
Smoked a cigarette, past 30 days	6	.	Too Few
Currently used an electronic vapor product	14	.	Too Few
Currently used smokeless tobacco	6	.	Too Few
Currently smoked cigars	4	.	Too Few

	Vermont %	SU %	Differences
Currently took any prescription medication without a doctor's prescription or differently than how a doctor told them to use it	5	.	Too Few
Currently drank alcohol	22	.	Too Few
Currently used marijuana	18	.	Too Few
Binge drank, past month	11	.	Too Few

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Usually got their electronic vapor products from a friend or family member, among current users	56	.	Too Few
Used electronic vapor products because friends/family used them, among current users	19	.	Too Few
Used electronic vapor products mainly because they were curious about them, among current users	26	.	Too Few

	Vermont %	SU %	Differences
Currently used an electronic vapor product to vape marijuana, among students who used an electronic vapor product	63	.	Too Few
Currently used an electronic vapor product to vape marijuana, among students who used marijuana	69	.	Too Few

	Vermont %	SU %	Differences
Usually used marijuana by smoking it in a joint, bong, pipe, or blunt, among students who used marijuana	57	.	Too Few
Usually vaped marijuana, among current users	23	.	Too Few

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Attended school under the influence of alcohol or other illegal drugs, past year	9	.	Too Few

	Vermont %	SU %	Differences
Say if they wanted to get electronic vapor products, it would be sort of easy or very easy for them to get some	51	.	Too Few
Say if they wanted to get alcohol, it would be sort of easy or very easy for them to get some	60	.	Too Few
Say if they wanted to get marijuana, it would be sort of easy or very easy for them to get some	47	.	Too Few

	Vermont %	SU %	Differences
Think people greatly risk harming themselves if they use electronic vapor products regularly	44	.	Too Few
Think people greatly risk harming themselves if they have five or more drinks of alcohol once or twice each weekend	38	.	Too Few
Think people greatly risk harming themselves if they use marijuana regularly	31	.	Too Few

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use electronic vapor products	89	.	Too Few
Responded that their parents or guardians feel it would be wrong or very wrong for the student to drink alcohol	69	.	Too Few
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use marijuana	78	.	Too Few

	Vermont %	SU %	Differences
Think it is wrong or very wrong for someone their age to use electronic vapor products	74	.	Too Few
Think it is wrong or very wrong for someone their age to drink alcohol	59	.	Too Few
Think it is wrong or very wrong for someone their age to use marijuana	64	.	Too Few

. = Too few students to report

Sexual Health

	Vermont %	SU %	Differences
Were ever tested for human immunodeficiency virus (HIV)	8	.	Too Few
Were tested for a sexually transmitted infection (STI) other than HIV, such as chlamydia or gonorrhea	7	.	Too Few

	Vermont %	SU %	Differences
Had sexual intercourse for the first time before age 13 years	3	.	Too Few
Ever had sexual intercourse	34	.	Too Few

. = Too few students to report

Current Sexual Activity

	Vermont %	SU %	Differences
Were sexually active, past 3 months	25	.	Too Few

	Vermont %	SU %	Differences
Among sexually active students, used a condom during last sexual intercourse	48	.	Too Few

	Vermont %	SU %	Differences
Among sexually active students, used birth control pills before last sexual intercourse with opposite-sex partner	27	.	Too Few
Among sexually active students, used an IUD, or implant before last sexual intercourse with an opposite-sex partner	22	.	Too Few
Among sexually active students, used birth control pills; an IUD or implant; or a shot, patch, or birth control ring before last sexual intercourse with an opposite-sex partner	53	.	Too Few

. = Too few students to report

BMI and Weight Related Behaviors

	Vermont %	SU %	Differences
Had obesity	14	.	Too Few
Were Overweight	14	.	Too Few

	Vermont %	SU %	Differences
Described themselves as slightly or very overweight	29	.	Too Few
Were trying to lose weight	40	.	Too Few

. = Too few students to report

Physical Activity

	Vermont %	SU %	Differences
Were physically active at least 60 minutes per day on 5 or more days, past week	52	.	Too Few
Did not participate in at least 60 minutes of physical activity on at least 1 day, past week	13	.	Too Few
Were physically active at least 60 minutes per day on all 7 days, past week	28	.	Too Few

. = Too few students to report

Nutrition

	Vermont %	SU %	Differences
Did not eat breakfast, past week	14	.	Too Few
Ate breakfast on 5 or more days, past week	49	.	Too Few
Ate breakfast on all 7 days, past week	31	.	Too Few

	Vermont %	SU %	Differences
Ate 5+ fruits/vegetables every day, past week	22	.	Too Few

	Vermont %	SU %	Differences
Did not eat fruit, past week	7	.	Too Few
Ate fruit one or more times per day, past week	46	.	Too Few
Ate fruit two or more times per day, past week	33	.	Too Few
Ate fruit three or more times per day, past week	15	.	Too Few

	Vermont %	SU %	Differences
Did not eat vegetables, past week	6	.	Too Few
Ate vegetables one or more times per day, past week	73	.	Too Few
Ate vegetables two or more times per day, past week	41	.	Too Few
Ate vegetables three or more times per day, past week	23	.	Too Few

. = Too few students to report

Social Determinants of Health

	Vermont %	SU %	Differences
Reported their family sometimes, most of the time, or always worried that their food would run out before they got money to buy more	10	.	Too Few
Reported sometimes, most of the time, or always the food their family bought ran out and they did not have money to buy more	7	.	Too Few
Think their family's subjective social status is worse than other families	4	.	Too Few
Sometimes, most of the time, or always worried food would run out or had food run out, past year	11	.	Too Few

. = Too few students to report

Protective Factors & Other Behaviors

	Vermont %	SU %	Differences
Used social media several times a day or more	77	.	Too Few
Do not use social media	9	.	Too Few

	Vermont %	SU %	Differences
Ate dinner at home with at least one of their parents or other adult family member on four or more days, past week	76	.	Too Few
Did not eat dinner at home with at least one of their parents or other adult family member, past week	10	.	Too Few
Ate dinner at home with at least one of their parents or other adult family member every day, past week	44	.	Too Few

. = Too few students to report

Protective Factors & Other Behaviors

	Vermont %	SU %	Differences
Strongly agree or agree that they feel close to people at their school	60	.	Too Few
Have at least one teacher or other adult in their school that they can talk to if they have a problem	74	.	Too Few
Strongly agree or agree that their school has clear rules and consequences for behavior	54	.	Too Few
Spend 10 or more hours participating in afterschool activities during an average week	23	.	Too Few
Report they are most likely to attend a 4-year college or university, a community college, or technical school after high school	70	.	Too Few

	Vermont %	SU %	Differences
Strongly agree or agree that in their community they feel like they matter to people	53	.	Too Few

. = Too few students to report
