2025 Vermont Youth Risk Behavior Survey

Maple Run School District Results

The Vermont Department of Health would like to acknowledge the work and effort of all the schools, teachers and students who participate in the Youth Risk Behavior Survey each year.

We would especially like to thank the students and schools in Maple Run School District who participated in the 2025 YRBS.

Participating High Schools
BELLOWS FREE ACADEMY-ST ALBANS

Participating Middle Schools
FAIRFIELD CENTER SCHOOL
ST ALBANS CITY SCHOOL
ST ALBANS TOWN EDUC CENTER

Copies of the questionnaires, state-wide reports, data briefs, and additional sub-state reports are available online. Visit the Vermont Department of Health YRBS website at: https://www.HealthVermont.gov/yrbs.

The Vermont Department of Health recognizes that many social, economic and environmental inequities made worse by structural oppression, marginalization and racism influence the data we collect and report. We are continuously working to better collect and share data that reflect the lived experiences of all Vermonters.

If you have questions or concerns or need help accessing or understanding this information, contact: AHS.VDHYRBS@vermont.gov

About the YRBS

The Youth Risk Behavior Survey (YRBS) is part of a national school-based survey that monitors the health-risk behaviors that contribute to the leading causes of death and disability among youth and young adults and high-priority health topics. These include:

- Behaviors that lead to injuries and violence
- Alcohol, Marijuana, and other drug use
- Tobacco use
- Unhealthy dietary behaviors
- Inadequate physical activity
- Sexual health
- Social determinants of health
- Youth assets

YRBS in Vermont

The Vermont Department of Health has conducted the YRBS in Vermont schools since 1993. We collaborate with the Agency of Education to administer the YRBS every two years during the spring semester at all public schools and select independent schools. Schools ending in 6th grade are not eligible to participate.

Methodology and Accuracy

The YRBS is designed to protect students' privacy. It's confidential, anonymous, and optional for students. When reporting data, we follow suppression rules to provide additional privacy. Data is suppressed when less than 50 students respond to a question or less than 5 students answer a question in a particular way.

Completion of the survey depends on a student's ability to read, understand, and complete the questionnaire on their own or with computer-assisted technology (e.g., screen readers). Students with very limited reading skills or significant intellectual or learning disabilities may not be fully represented in this data.

Additional information about the methodology has been described by the CDC and can be found online.at: https://www.cdc.gov/yrbs/index.html

How Accurate are the Results

Research shows that self-reported survey data from adolescents is as credible as self-reported data from adults. The anonymous survey design and survey environment encourage students to be honest and open.

Consistency checks, weights, and other internal checks are used to ensure the data is accurate and representative. For more information on survey reliability including "Do students tell the truth" is available on the Vermont Department of Health YRBS webpage at: https://www.HealthVermont.gov/yrbs

Understanding and Interpreting the Results

Statistical Differences

Throughout this report, statistically significant differences are noted. Statistical significance is calculated by comparing the 95% confidence intervals of two or more values. If the confidence intervals overlap, the percentages are not different. In other words, the two groups are not statistically different from one another. If the confidence intervals do not overlap, there is a statistical difference between the two groups.

A 95% confidence interval is a range of values and can vary due to the size of a particular population or how consistently students responded to an item. Sometimes, when comparing the responses of two or more groups, the overall percent may look very different, but the two numbers are not statistically different. Other times, the two values may be very close but differ statistically.

While this report notes statistical differences, we encourage you to consider meaningful differences: does the disparity merit a targeted intervention, show a real change in health, or otherwise mean something important to the community (statistics aside).

In this report, comparisons are made with the overall statewide rate. Statistical differences are noted in each table.

Data Suppression

For some questions, not enough students respond to be able to report an estimate. In those instances, a dot (.) indicating “too few students” is noted in the table. Reportable estimates include a numerator of at least 5 students and denominator of 50 or more students.

Using the YRBS

Engaging students, schools, and communities

The YRBS can detect changes in risk behaviors over time and identify differences among ages, grades, and genders. With these data, school and community organizations can focus prevention efforts and determine whether school policies and community programs are having the intended effect on student behaviors.

Think of the YRBS as a tool for starting discussions, for educating the community, for planning and evaluating programs, and for comparing Vermont students with other students nationwide.

Start the Conversation: Use the YRBS to begin a conversation with teens about the personal choices they make or about the health of their community. Ask them if the Results accurately reflect what they see happening around them. How do they explain the Results? From their perspective, what is or is not working? How would they promote healthy behaviors?

Increase Awareness: The YRBS provides an opportunity to break through "denial" and make community members aware of the risks that their young people face. It can also dispel myths and correct misinformation about the "average teenager." The YRBS can accentuate the positive and celebrate the fact that many students are abstaining from behaviors that endanger their health and their ability to succeed.

Plan and Evaluate Programs: The YRBS can serve as the basis of a community needs assessment. It can help identify strengths and weaknesses in communities and can inform strategies to address those weaknesses.

Remember to Look at the Positive Side: In most cases, the majority of adolescents are NOT engaging in risky behaviors. Although most of the charts examine the prevalence of risk behaviors, please do not forget about the percentage of adolescents who are NOT engaging in these behaviors.

Participate in Getting to Y: Getting to Y provides an opportunity for students to take a lead in bringing meaning to their own Youth Risk Behavior Survey data and taking steps to strengthen their school and community based on their findings. Schools and districts across the state form teams to analyze local level data, identify areas of strength and concern, and create a preliminary action plan. Through the Getting to Y program, students attend a training day where they learn tools and strategies to examine data, explore root causes, and create next action steps. In addition, teams plan and host a community dialogue event to share their executive summary with the school and community.

For more information on upcoming Getting to Y trainings, newsletters, and resources visit Getting to Y at: http://www.upforlearning.org/initiatives/getting-to-y

2025 Vermont Youth Risk Behavior Survey Report

High School Results

Demographics

Maple Run School District	N
Overall	674

Sex	N	%
Male	343	52
Female	330	48

Grade	N	%
9th grade	177	26
10th grade	185	26
11th grade	180	26
12th grade	127	22

Race / Ethnicity	N	%
BIPOC	114	12
White non-Hispanic	559	88

Sexual Orientation & Gender Identity	N	%
LGBTQ+	119	18
Heterosexual Cisgender	533	82

Note: Students are not required to answer questions on the YRBS. Therefore, totals by specific demographics may not equal the overall total.
N = Unweighted number of students; % = Weighted percent

Demographics

IEP / 504 Plan Status	N	%
Have a current IEP or 504 plan	117	18
Do not have a current IEP or 504 plan	543	82

Note: Students are not required to answer questions on the YRBS. Therefore, totals by specific demographics may not equal the overall total.
N = Unweighted number of students; % = Weighted percent

Unintentional Injuries and Prevention

	Vermont %	SU %	Differences
Were asked by a doctor, dentist, or nurse if they used a tobacco product, among those who saw a doctor, past year	45	48	SU > VT
Had a sunburn, past year	69	67	
Had a concussion from playing a sport or being physically active, past year	19	19	
Among those who rode a bicycle or skateboard or rollerbladed, rarely or never wore a helmet, past year	34	43	SU > VT

. = Too few students to report

Motor Vehicle Safety

	Vermont %	SU %	Differences
Rode in a car or other vehicle driven by someone who had been using marijuana, past 30 days	18	18	
Rode with a driver who had been drinking alcohol, past 30 days	16	14	

	Vermont %	SU %	Differences
Texted or e-mailed while driving a car or other vehicle, among students who drive, past 30 days	40	40	
Drove a car or other vehicle after using marijuana, among students who drive, past 30 days	10	8	
Drove a car or other vehicle when they had been drinking alcohol, among students who drive, past 30 days	6	6	

. = Too few students to report

Bullying and School Safety

	Vermont %	SU %	Differences
Were bullied, past 30 days	19	20	
Bullied someone else, past 30 days	12	14	SU > VT
Were electronically bullied, past year	15	16	

	Vermont %	SU %	Differences
Carried a weapon on school property, past 30 days	5	4	
Were threatened or injured with a weapon on school property, past year	7	9	SU > VT
Were in a physical fight, past year	17	16	

. = Too few students to report

Family and Neighborhood Violence & Other Risk Factors

	Vermont %	SU %	Differences
Felt that they were ever treated badly or unfairly because of their sexual orientation, gender or gender expression	19	17	VT > SU
Did not go to school because they felt unsafe at school or on their way to or from school, past 30 days	7	11	SU > VT
Felt that they were ever treated badly or unfairly because of their race or ethnicity	17	18	

	Vermont %	SU %	Differences
Ever saw someone get physically attacked, beaten, stabbed, or shot in their neighborhood	15	22	SU > VT
Could obtain a loaded gun ready for them to fire without a parent or other adult's permission or supervision	38	40	

. = Too few students to report

Sexual and Dating Violence

	Vermont %	SU %	Differences
Experienced physical dating violence, among those who dated in past year	12	16	SU > VT
Were controlled or emotionally hurt by someone going out or dating, among those who dated in past year	28	28	
Were ever made to do sexual things they did not want to, by someone 5+ years older	7	7	

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Were bothered by feeling nervous, anxious, or on edge, most of the time or always, past year	29	27	
Felt sad or hopeless, past year	23	23	
Reported that their mental health was most of the time or always not good, past 30 days	25	24	

	Vermont %	SU %	Differences
Did something to purposely hurt themselves without wanting to die, past year	18	15	VT > SU
Made a plan about how they would attempt suicide, past year	10	10	
Actually attempted suicide, past year	6	6	

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Most of the time or always feel that they are able to talk to an adult in their family or another caring adult about their feelings	59	59	
Most of the time or always feel that they are able to talk to a friend about their feelings	59	62	
Most of the time or always got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among those who needed help, past year	27	26	
Never or rarely got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among those who needed help	45	49	SU > VT

. = Too few students to report

Lifetime Substance Use

	Vermont %	SU %	Differences
Ever tried an electronic vapor product	26	28	
Ever smoked a cigarette, even one or two puffs	17	15	
Ever drank alcohol	44	42	
Ever tried marijuana	30	29	

	Vermont %	SU %	Differences
First tried an electronic vapor product before age 13 years	7	8	
Smoked a cigarette before age 13 years	6	5	
Had their first drink of alcohol before age 13	12	11	
Tried marijuana for the first time before age 13 years	6	5	

	Vermont %	SU %	Differences
Ever took prescription pain medicine without a doctor's prescription or differently than how a doctor told them to use it	7	7	
Ever used cocaine	3	3	
Ever used inhalants	6	7	
Ever used heroin	3	2	
Ever used methamphetamines	2	2	

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Currently smoked cigarettes or cigars or used smokeless tobacco	10	9	
Currently smoked cigarettes or cigars or used smokeless tobacco or electronic vapor products	18	20	

	Vermont %	SU %	Differences
Smoked a cigarette, past 30 days	6	4	VT > SU
Currently used an electronic vapor product	14	17	SU > VT
Currently used smokeless tobacco	6	5	VT > SU
Currently smoked cigars	4	4	

	Vermont %	SU %	Differences
Currently took any prescription medication without a doctor's prescription or differently than how a doctor told them to use it	5	4	
Currently drank alcohol	22	19	VT > SU
Currently used marijuana	18	16	
Binge drank, past month	11	9	VT > SU

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Usually got their electronic vapor products by buying them themselves in a convenience store, supermarket, discount store, or gas station, among current users	4	.	Too Few
Usually got their electronic vapor products from a friend or family member, among current users	56	61	
Used electronic vapor products because friends/family used them, among current users	19	24	SU > VT
Used electronic vapor products mainly because they were curious about them, among current users	26	21	VT > SU

	Vermont %	SU %	Differences
Currently used an electronic vapor product to vape marijuana, among students who used an electronic vapor product	63	57	
Currently used an electronic vapor product to vape marijuana, among students who used marijuana	69	77	SU > VT

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Usually ate or drank marijuana, among current users	12	8	
Usually used marijuana by dabbing it, among students who used marijuana	3	.	Too Few
Usually used marijuana in some other way, among students who used marijuana	5	.	Too Few
Usually used marijuana by smoking it in a joint, bong, pipe, or blunt, among students who used marijuana	57	47	VT > SU
Usually vaped marijuana, among current users	23	38	SU > VT

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Attended school under the influence of alcohol or other illegal drugs, past year	9	9	

	Vermont %	SU %	Differences
Say if they wanted to get electronic vapor products, it would be sort of easy or very easy for them to get some	51	47	VT > SU
Say if they wanted to get alcohol, it would be sort of easy or very easy for them to get some	60	57	
Say if they wanted to get marijuana, it would be sort of easy or very easy for them to get some	47	41	VT > SU

	Vermont %	SU %	Differences
Think people greatly risk harming themselves if they use electronic vapor products regularly	44	42	
Think people greatly risk harming themselves if they have five or more drinks of alcohol once or twice each weekend	38	34	VT > SU
Think people greatly risk harming themselves if they use marijuana regularly	31	30	

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use electronic vapor products	89	89	
Responded that their parents or guardians feel it would be wrong or very wrong for the student to drink alcohol	69	71	
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use marijuana	78	80	

	Vermont %	SU %	Differences
Think it is wrong or very wrong for someone their age to use electronic vapor products	74	72	VT > SU
Think it is wrong or very wrong for someone their age to drink alcohol	59	60	
Think it is wrong or very wrong for someone their age to use marijuana	64	67	SU > VT

. = Too few students to report

Sexual Health

	Vermont %	SU %	Differences
Were ever tested for human immunodeficiency virus (HIV)	8	10	SU > VT
Were tested for a sexually transmitted infection (STI) other than HIV, such as chlamydia or gonorrhea	7	8	

	Vermont %	SU %	Differences
Had sexual intercourse for the first time before age 13 years	3	3	
Ever had sexual intercourse	34	40	SU > VT

. = Too few students to report

Current Sexual Activity

	Vermont %	SU %	Differences
Were sexually active, past 3 months	25	31	SU > VT

	Vermont %	SU %	Differences
Among sexually active students, drank alcohol or used drugs before last sexual intercourse	18	16	
Among sexually active students, used a condom during last sexual intercourse	48	47	

	Vermont %	SU %	Differences
Among sexually active students, used birth control pills before last sexual intercourse with opposite-sex partner	27	29	
Among sexually active students, did not use any method to prevent pregnancy during last sexual intercourse with an opposite-sex partner	7	9	
Among sexually active students, used a condom as the primary method to prevent pregnancy before last sexual intercourse with an opposite-sex partner	30	26	
Among sexually active students, used an IUD, or implant before last sexual intercourse with an opposite-sex partner	22	17	VT > SU
Among sexually active students, used birth control pills; an IUD or implant; or a shot, patch, or birth control ring before last sexual intercourse with an opposite-sex partner	53	53	

. = Too few students to report

BMI and Weight Related Behaviors

	Vermont %	SU %	Differences
Had obesity	14	15	
Were Overweight	14	16	

	Vermont %	SU %	Differences
Described themselves as slightly or very overweight	29	30	
Were trying to lose weight	40	42	

. = Too few students to report

Physical Activity

	Vermont %	SU %	Differences
Were physically active at least 60 minutes per day on 5 or more days, past week	52	55	SU > VT
Did not participate in at least 60 minutes of physical activity on at least 1 day, past week	13	11	
Were physically active at least 60 minutes per day on all 7 days, past week	28	31	SU > VT

. = Too few students to report

Nutrition

	Vermont %	SU %	Differences
Did not eat breakfast, past week	14	17	SU > VT
Ate breakfast on 5 or more days, past week	49	45	VT > SU
Ate breakfast on all 7 days, past week	31	30	

	Vermont %	SU %	Differences
Ate 5+ fruits/vegetables every day, past week	22	15	VT > SU

	Vermont %	SU %	Differences
Did not eat fruit, past week	7	7	
Ate fruit one or more times per day, past week	46	35	VT > SU
Ate fruit two or more times per day, past week	33	24	VT > SU
Ate fruit three or more times per day, past week	15	13	VT > SU

	Vermont %	SU %	Differences
Did not eat vegetables, past week	6	8	SU > VT
Ate vegetables one or more times per day, past week	73	64	VT > SU
Ate vegetables two or more times per day, past week	41	32	VT > SU
Ate vegetables three or more times per day, past week	23	17	VT > SU

. = Too few students to report

Social Determinants of Health

	Vermont %	SU %	Differences
Experienced unstable housing, past year	4	2	VT > SU
Reported their family sometimes, most of the time, or always worried that their food would run out before they got money to buy more	10	7	VT > SU
Reported sometimes, most of the time, or always the food their family bought ran out and they did not have money to buy more	7	5	VT > SU
Think their family's subjective social status is worse than other families	4	4	
Sometimes, most of the time, or always worried food would run out or had food run out, past year	11	8	VT > SU

. = Too few students to report

Protective Factors & Other Behaviors

	Vermont %	SU %	Differences
Used social media several times a day or more	77	79	SU > VT
Do not use social media	9	9	

	Vermont %	SU %	Differences
Ate dinner at home with at least one of their parents or other adult family member on four or more days, past week	76	70	VT > SU
Did not eat dinner at home with at least one of their parents or other adult family member, past week	10	11	
Ate dinner at home with at least one of their parents or other adult family member every day, past week	44	44	

. = Too few students to report

Protective Factors & Other Behaviors

	Vermont %	SU %	Differences
Strongly agree or agree that they feel close to people at their school	60	56	VT > SU
Have at least one teacher or other adult in their school that they can talk to if they have a problem	74	71	VT > SU
Strongly agree or agree that their school has clear rules and consequences for behavior	54	55	
Spend 10 or more hours participating in afterschool activities during an average week	23	21	
Report they are most likely to attend a 4-year college or university, a community college, or technical school after high school	70	62	VT > SU

	Vermont %	SU %	Differences
Strongly agree or agree that in their community they feel like they matter to people	53	49	VT > SU

. = Too few students to report

Unintentional Injuries and Prevention

	Vermont %	SU %	Differences
Had a concussion from playing a sport or being physically active, past year	18	18	
Rarely or never wore a bicycle helmet, among students who rode a bicycle	23	23	
Rarely or never wore a helmet when rollerblading or skateboarding, among students who rollerblade or skateboard	23	24	

	Vermont %	SU %	Differences
Were asked by a doctor, dentist, or nurse if they used a tobacco product, past year, among students who saw a medical provider	28	29	
Had 1+ sunburns, past year	62	63	

	Vermont %	SU %	Differences
Have ever ridden in a car driven by someone who had been using marijuana	12	9	VT > SU
Did not always wear a seat belt	22	16	VT > SU
Ever rode with a driver who had been drinking alcohol	16	14	

. = Too few students to report

Physical Violence, Bullying and School Safety

	Vermont %	SU %	Differences
Felt that they were ever treated badly or unfairly in school because of their race or ethnicity	24	22	
Felt that they were ever treated badly or unfairly because they are or people think they are lesbian, gay, bisexual, transgender, or questioning	20	17	VT > SU
Have ever been teased or called names because of their weight, size, or physical appearance	55	53	

	Vermont %	SU %	Differences
Were ever bullied on school property	46	46	
Were ever electronically bullied	27	30	
Were bullied, past 30 days	26	24	VT > SU
Bullied someone, past 30 days	12	11	
Were ever in a physical fight	39	35	VT > SU

	Vermont %	SU %	Differences
Did not go to school because they felt unsafe at school or on their way to or from school, past 30 days	11	14	SU > VT

. = Too few students to report

Family and Neighborhood Violence & Other Risk Factors

	Vermont %	SU %	Differences
Ever saw someone get physically attacked, beaten, stabbed, or shot in their neighborhood	15	16	
Could obtain a loaded gun ready for them to fire without a parent or other adult's permission or supervision	37	32	VT > SU
Reported that an adult or person at least 5 years older than them ever made them do sexual things they did not want to do	4	5	

. = Too few students to report

Mental Health

	Vermont %	SU %	Differences
Reported that their mental health was most of the time or always not good	20	22	
Felt sad or hopeless every day for 2 weeks or more in a row, past year	22	26	SU > VT

	Vermont %	SU %	Differences
Ever did something to purposely hurt themselves without wanting to die	19	22	SU > VT
Ever seriously thought about killing themselves	18	22	SU > VT
Ever made a plan about how they would kill themselves	13	14	
Ever tried to kill themselves	7	9	SU > VT

	Vermont %	SU %	Differences
Most of the time or always got the kind of help they needed when feeling sad, empty, hopeless, angry, or anxious, among students who needed help	36	35	

	Vermont %	SU %	Differences
Would most likely talk to an adult in their school or an adult outside of school who is not a family member about their feelings, among students who felt sad/angry/anxious	6	4	VT > SU

. = Too few students to report

Lifetime Substance Use

	Vermont %	SU %	Differences
Ever smoked a cigarette	6	7	SU > VT
Ever drank alcohol	16	15	
Ever tried marijuana	6	7	
Ever tried an electronic vapor product	10	11	
Ever tried a flavored tobacco product	5	5	

	Vermont %	SU %	Differences
Ever took prescription pain medicine without a doctor's prescription or differently than how a doctor told them to use it	6	5	
Ever used inhalants	5	4	

	Vermont %	SU %	Differences
Smoked a cigarette before age 11 years	3	4	SU > VT
Drank alcohol for the first time before age 11 years	7	6	VT > SU
Tried marijuana for the first time before age 11 years	2	2	
First tried an electronic vapor product before age 11 years	3	4	
First tried a flavored tobacco product before age 11	2	3	SU > VT

. = Too few students to report

Current Substance Use

	Vermont %	SU %	Differences
Currently smoked cigarettes or cigars or used smokeless tobacco	2	2	
Currently smoked cigarettes or cigars or used smokeless tobacco or electronic vapor products	5	5	

	Vermont %	SU %	Differences
Smoked a cigarette, past 30 days	1	.	Too Few
Used an electronic vapor product, past 30 days	5	4	
Used smokeless tobacco, past 30 days	1	1	
Smoked a cigar, past 30 days	1	1	

	Vermont %	SU %	Differences
Drank alcohol, past 30 days	4	3	
Used marijuana, past 30 days	3	3	

	Vermont %	SU %	Differences
Used electronic vapor products mainly because they were curious about them	3	3	
Used electronic vapor products because they were feeling anxious, stressed, among current users	22	.	Too Few
Used electronic vapor products because friends/family used them, among current users	25	.	Too Few

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Say if they wanted to get electronic vapor products, it would be sort of easy or very easy for them to get some	18	16	
Say if they wanted to get alcohol, it would be sort of easy or very easy for them to get some	34	29	VT > SU
Say if they wanted to get marijuana, it would be sort of easy or very easy for them to get some	15	14	

	Vermont %	SU %	Differences
Think it is wrong or very wrong for someone their age to use electronic vapor products	92	91	

	Vermont %	SU %	Differences
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use electronic vapor products	95	96	
Responded that their parents or guardians feel it would be wrong or very wrong for the student to drink alcohol	88	88	
Responded that their parents or guardians feel it would be wrong or very wrong for the student to use marijuana	94	92	VT > SU

. = Too few students to report

Perceptions Around Substance Use

	Vermont %	SU %	Differences
Think people greatly risk harming themselves if they use electronic vapor products regularly	52	53	
Think people greatly risk harming themselves if they have five or more drinks of alcohol once or twice each weekend	42	42	
Think people greatly risk harming themselves if they use marijuana regularly	48	52	SU > VT

. = Too few students to report

Sexual Health

	Vermont %	SU %	Differences
Ever had sexual intercourse	4	5	
Used a condom during last sexual intercourse, among students who had sexual activity	44	.	Too Few

. = Too few students to report

Physical Activity

	Vermont %	SU %	Differences
Were physically active at least 60 minutes per day on 5 or more days, past week	58	58	
Did not participate in at least 60 minutes of physical activity on at least 1 day, past week	11	10
