

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Medical/Surgical Unit

The Adult Medical/Surgical Units have 289 licensed beds. Types of services provided in this setting include care of people with general medical and surgical problems, heart monitoring, end-of-life care, care of people with cancer, orthopedic care, and rehabilitative care.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

2024 Nurse Staffing Data

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 75.67%.

Med/Surg Unit

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2017 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

Med/Surg Unit (2nd floor) 2017 - 2024

2024 Nurse Staffing Data

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2017 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Intensive Care Unit

The Intensive Care Units have 46 licensed beds and care for patients of all ages. Types of services provided in this setting may include care of people with, or at risk of developing life-threatening problems.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 91.17%.

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2017 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2017 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Inpatient Psychiatric Unit

The Inpatient Psychiatric Unit has 28 licensed beds and cares for adult patients. Types of services provided in this setting include short-term, secure, inpatient care for individuals with a mental health diagnosis, substance abuse disorder, or both.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Psychiatric Unit

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 77.76%.

Psychiatric Unit

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2017 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

Psychiatric 2017-2024

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2017 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Average % of Nursing Care Provided by RN 2017-2024

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Neonatal Intensive Care Unit (NICU)

The Neonatal Intensive Care Unit has 20 licensed beds and cares for premature and critically ill infants. This report does not include the Neonatal Transition Intermediate Care beds.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 99.45%.

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2017 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2017 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Mother-Baby Unit

The Mother-Baby Unit has 28 licensed beds.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 85.23%.

Mother-Baby Unit

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2017 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

Mother-Baby 2017-2024

2024 Nurse Staffing Data

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2017 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Inpatient Rehabilitation Unit

The Inpatient Rehabilitation Unit has 35 licensed beds. It provides care for people who require 24-hour physician availability, 24-hour nursing care, and the skill of at least two different therapies, and can tolerate at least three hours of therapy for five days a week. Its focus is on helping people to achieve a level of independence to safely leave our acute care setting and continue his/her recovery at home or in some instances, at a subacute pace.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 74.89%.

Rehabilitation Unit

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2017 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

Rehab 2017-2024

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2017 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Average % of Nursing Care Provided by RN 2017-2024

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Pediatric Unit

The Pediatric Unit has 20 licensed beds and provides medical-surgical care for children aged from infants to young adults with general illnesses or injuries.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 90.64%.

Pediatric Unit

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2017 - 2024
