Chronic Disease in the Rutland District Office Area

3-4-50 is a simple concept to help us grasp the reality that 3 health behaviors contribute to 4 chronic diseases that claim the lives of more than 50 percent of Vermonters. This data brief compares these measures of all Vermont adults and adults living within the Rutland District Office area of Rutland County.

3 BEHAVIORS
Lack of physical activity, poor nutrition and tobacco use are three behaviors that contribute to the development and severity of chronic disease. Four out of five adults in the Rutland District Office area do not eat enough fruits and vegetables. Two in five do not get the recommended amount of physical activity and one in five adults smoke.

Health Behaviors that Contribute to Chronic Disease
