September WIC Deliveries

For Immediate Release: September 1, 2011
Media Contact: Communication Office
802-863-7281

WIC vendors are working to deliver September food orders as scheduled except in areas hardest hit by flooding. Expect delays in communities where temporary roads have been put in place - we don't know yet if vendors delivering in these areas will be able to get through. Your vendor and local district office will be keeping a detailed list of roads vendors have not been able to access.

If you have a WIC appointment and need to reschedule, please contact your local office of the Vermont Department of Health.

For more information, please visit [WIC](#).
