#	Time Allotted (Optional)	Type of Topic	Agenda Item (Topic/Objective)	Notes
1	1:00-1:10	□ Inform □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □	Welcome, Introductions, and June minute review	 Melanie Sheehan: Thank you to this group that continues to prioritize substance use prevention despite the challenges and additional COVID work. June minutes were approved.
2	1:10-1:30	□ Inform □ Discussion □ Decision	Universal Afterschool Recommendations	 Though we are unsure what will be allowed for afterschool programming due to COVID or what action S.335 will have in the August session, the SMPC agreed to ensure that the SMPC recommendations regarding bill S.335 are ready for review by the legislature. The recommendations are approved with the additional pieces to be added by Nicole Rau Mitiguy in consult with ADAP leadership and Auburn Watersong: Add reference to COVID regulations and the impact that could have, with links for resources on engagement in activities as related to COVID safety measures Add recommendation that all afterschool providers must complete a training on substance use prevention, noting that this would align with the Icelandic model to prevention as substance use prevention training is completed by individuals across sectors Further clarity given that a recommendation should be to ensure this training is allowed to be counted toward professional development to align requirements rather than adding an additional requirement The Substance Misuse Prevention Manager to coordinate with Auburn Watersong and ADAP's Prevention Unit to review current presentations available and ensure this is interwoven within the content. In addition to, or in alignment with the prevention training, a recommendation was made to ensure building resiliency and protective factors for youth to be a component of the required training as there is a connection between substance use and resiliency as seen in YRBS data as discussed in the follow slide deck: Puecision that Substance Misuse Prevention Manager can make these modifications without additional SMPC approval. Kelly Dougherty will connect with VDH Policy team to identify the mechanism to provide SMPC recommendations to the legislation for their review Public Comment from: Lori Tatsapaugh Uerz

1					
3	1:30-2:30	☑ Inform	SMPC	• The VT Legislature will come back for a special session on August 25 th . S. 54 is not currently slated to be	
		Diamonia a	Recommendations	discussed in this special session, but it could be brought up if the legislature decides to do so.	
		Discussion Decision	related to S. 54	The cannabis workgroup have met two times since our June meeting, with one of those meetings having	
		E Decision		all of the members present.	
				 Workgroup has an active Google Doc with all of the resources informing the work of the 	
				workgroup	
				 The workgroup reviewed the S. 54 bill and House amendment, in relation to the workgroup's 	
				recommendation to compare what is written in the bill/amendment and what the workgroup	
				would recommend.	
				From the language currently included in S. 54 the Cannabis Control Board would hold the	
				responsibility of creating rules around packaging and advertising rather than the guidance or	
				requirements being included in the bill itself	
				The workgroup believes that there is enough Vermont specific data to make recommendations	
				for a Vermont specific threshold for roadway safety. The current bill does not include	
				amendments to Title 23 Section 1201 a.3 But DLL feels amendments to this title could be made	
				using 2012-2018 VT infraction data.	
				The THC limits included in this bill are high, per data and research completed in relation to THC	
				potency levels.	
				 It appears that the lens of S. 54's approach leans more toward a business or agricultural 	
				approach rather than a public health or safety focus.	
				Workgroup was exploring if an "Opt In" approach for municipalities should be included	
				regarding where cannabis could be sold, rather than the "opt out" approach currently included	
				in the bill. The concern with "opt in" is that it creates an equity issue.	
				 The SMPC agreed with the workgroup that this approach poses an equity issue as Vermont 	
			locations with more resources may be more likely to push against having retail cannab		
		`		where underserved locations may not "opt out" which would add the burden on those	
				communities to house these retailers. This leads to cannabis retail being more prevalent in	
				marginalized communities, shifting social norms.	
			_		
				popular option among current legislators due to testimony heard to date.	
				Questions on oils as part of the recommendation – external or for vaping	
				 Could be for both 	
				 If it came prepackaged with its own vaping device, would not follow those mg dose 	
				limits set in the bill as it relates to oils	

-	
	 Concern over the impact this could have on youth in particular, specifically as it relates to EVALI
	Evidence based practice and lessons learned through work on prevention of tobacco use that
	was shared to inform the work around cannabis prevention included the following:
	 Designated smoking areas for state parks and beaches
	 There is still a lot of visibility and exposure within these designated areas
	 Restricting use around municipal buildings, especially popular public access buildings
	 Concerns about exposure when entering and existing buildings with individuals using
	outside of the building. There is a need to ensure there is enough space away from
	these buildings to truly protect individuals entering and exiting the building from
	exposure
	 Price floor – this is a weakness for tobacco, there is a suggestion to establish this for
	cannabis (and perhaps frame in a way that includes tobacco and cannabis)
	 VDH's Tobacco Control Program can share a webinar on the policy approach for a
	tobacco price floor for the workgroup to review and inform this potential
	consideration (https://countertobacco.org/policy/raising-tobacco-prices-through-
	non-tax-approaches/)
	 Currently there are no restriction on flavors for tobacco in Vermont
	 Neighbors in New England are very active in this policy work
	 There was a call to action from a Council member to try and align policies and
	messaging between tobacco and cannabis highlighting that the more there is parody
	between this work, the easier it will be to shift culture and attitudes.
	Open invitation for folks to join the workgroup that would be interested
	Chris Herrick will be joining the workgroup
	 Chris has sat through quite a few hours of testimony
	 In addition to having a roadway test, there was a request to include the recommendation of
	also expanding Drug Recognition Experts known as DREs in the state.
	 DREs are law enforcement officers who are specifically trained to identify when folks are
	under the influence of drugs
	 Currently there are only a few DREs trained. It takes a significant amount of time for
	a DRE to arrive on scene if called by another officer.
	a z n z o a n n o o n o o o o o o o o o o o o o

The legislature believes all law enforcement officers should be trained, however to accomplish this it would take an extreme amount of time and resources and would not meet the immediate need if S. 54 was passed. An additional point for consideration is the impact S. 54 would have on environment health because of the impact that commercial cannabis would have on the environment Question on if the council should include some language around environmental health for this set of recommendations One thought is that because environmental health is a public health issue, we should include this lens in our set of recommendations The current language on the Cannabis Review Board's membership is focused on a business or agricultural approach. Public health and youth sectors are either not included or minimal o From the literature, the best practice is to not include a cannabis industry representation or vested interest The workgroup will likely propose a recommendation to expand the current membership to take a more public health view and framework noting that including a member of public health could also increase the perception of risk from consumers as public health inclusion might indicate a health impact. Council member agreed with the need for someone with an epidemiology background should be included on the Cannabis Review Board to be able to discuss of link between protective factors and substance use. In the current bill, the SMPC has budgetary oversight of the percentage of the excise tax which could help direct where the investments will be, such as in prevention and messaging campaigns. In this light, there was general agreement that a SMPC member should be included on the oversight board. There are many times where there is a rub between economic development and public health An ask from Melanie Sheehan -- is there experience within this group for navigating this rub? The Rand report on cannabis has many pages on multiple economic models This report is still available, with additional new journal articles around how public health sector should be included in the board ■ The LA County RAM (Retail Access to Marijauana) Marijuana Policy Decision Matrix was cross referenced into the recommendations presented today. Are there lessons learned from other states on this issue?

	 Opportunity to do this in a proactive way 		
	 The RPP Marijuana Conference, canceled because of COVID-19, was going to look at 		
	lessons learned from other states		
	 This would have brought in experts from CO and CA to reintroduce the issue and 		
	what other states are working with, including RAM group		
	 ADAP is exploring if there is a way that this can be done this in person, or potentially have some webinars to bring this information in to the state 		
	Does ADAP have contacts with the states to bring information in on who is included on the Control Board?		
	 Lori Tatsapaugh Uerz, Vermont's representative on the National 		
	Prevention Network is willing to ask other National Prevention		
	Network representatives about contacts to inform the workgroup		
	 Melanie Sheehan to provide language to Lori for this 		
	request		
	The workgroup will provide the full council draft recommendations in early August for		
	discussion during the August SMPC meeting on August 24 th		
	alsoussion during the hagast sivil e meeting on hagast 2 i		
	An additional topic for consideration is CBD age restriction for sales:		
	 No current age of sale restriction for CBD 		
	 For states that have a tax and regulate system for cannabis have a 21-age restriction 		
	Some CBD companies include language on CBD product labels that should they are		
	not be used for folks under 21		
	 Question on if this should be considered for this Council's recommendations on S.54 		
	 Initial feeling is that it could be too much, especially since this bill is focused on THC 		
	especially as CBD is too widely sold, so is not practical to include in this bill		
	 Potential for this to be a separate topic for this Council to review separate from this 		
	work.
