Definitions:

Met: meets the vaccine requirements as defined by regulation. Includes students with evidence of immunity due to history of disease

Not met: does not meet the vaccine or evidence of immunity requirement. Includes students with medical or religious exemptions, and students provisionally admitted

Medical and religious exemption: includes students with a signed exemption form for one or more vaccines

Provisional admittance: includes students who neither meet requirements for one or more vaccines nor have a current signed exemption

Enrollment: includes only fall semester new enterers i.e. first year and transfers

Limitations of the data:

Any student counted as "not met" for an individual vaccine must also be represented as having either an exemption, or counted as provisionally admitted.

When looking at the individual vaccines it is not always possible to determine why compliance was not met.
