

VIMS: VIEW HISTORY

TRACKING SHIPMENTS

Shipment tracking and carrier information is added to an Order Request the morning after it is shipped by the distributor (McKesson for refrigerated vaccines and Merck for frozen). The viewer can find this information by:

- 1) Clicking on the View History link in the Menu
- 2) Look for Request Type: *Order*
- 3) Request Status:

Incomplete, Submitted, IZ Hold, Approved, Pending Extract or Pending Shipment = shipment information unavailable

Partial Shipment or Full Shipment = shipment information available

- 4) If shipment information is available, click on the “View” link

Can I track my *pediatric Influenza* order?

Unfortunately, there is currently not a way to track flu vaccine orders. However, flu orders are added to your inventory by Immunization Program staff via an Adjustment Request the morning after they ship. You can check the View History section in VIMS for an Adjustment mid-morning- if it is there you'll know it is on the way.

Weather permitting, flu vaccine is usually shipped by McKesson the business day after the order is placed.
