

The **Patient List by DOB** report in the Vermont Immunization Registry can be a helpful tool to identify patients in your practice who have **not** received COVID-19 doses at hospitals, pharmacies, mass clinics or medical practices.

To find the Registry: Enter “Vermont Immunization Registry” in any search engine. You will need a username and password. If you have forgotten yours, or do not have one, call us at (888) 688-4667.

To find the report in the registry: Log in with your password and search for and select any patient record. Now select Immunization Registry in the blue navigation bar at the left-hand side of the screen. The screenshot below shows the immunization screen, and the red arrow points to the **Patients List by DOB** report.

Actions:

- Search Patient
- Current Patient
- Search Practice
- VAERS
- Immunization Information for Providers

	Hep B, adolescent or pediatric					
	Hep B, adjuvanted					
	rotavirus, pentavalent					
	rotavirus, monovalent					
	MMR					
	MMR-Varicella					

Creating the report: When this screen comes up, be sure the correct practice is selected. Enter the date range of the age group you are looking for.* Click the check box to select only patients with no COVID-19 doses. You can sort by last name, or use the label selection to print a list of 3x10 mailing labels to contact your patients. Click Create Report.

Patient List by DOB

Practice:

Patient Birth Date Start:

Patient Birth Date End:

Select only patients with no doses of COVID Vaccine.

Sort Labels By Last Name Sort Labels by Zip

**It is best to use a date range of 10 years or less, as the report may time out if the group is too large.*

Finished Report: The completed report will look like this. You can either save or print the file from here.
