

Breast Cancer Screening

It is important to know your risks. Schedule an appointment with your doctor to plan your mammogram.

1 in 8 women

will get breast cancer in her lifetime

There is no sure way to prevent breast cancer. We do know that it is easier to treat breast cancer that is found early.

Mammograms

Mammograms are x-ray pictures that doctors use to look for signs of breast cancer. Mammograms can find breast cancer up to three years before a lump can be felt.

You First pays for mammograms for members.
